

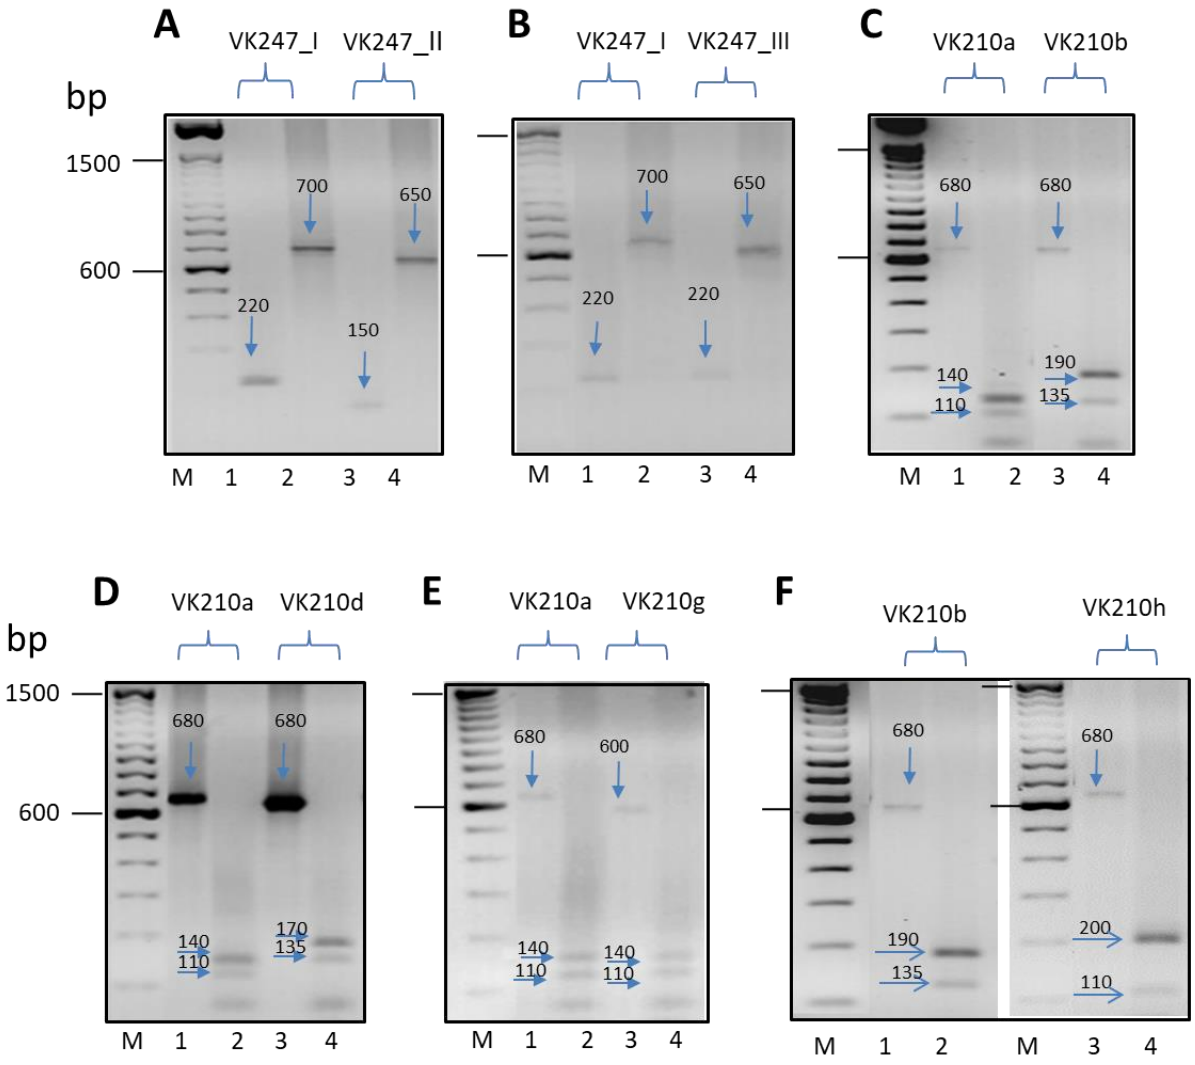

Figure S2. PCR-RFLP of *pvcsp* gene from isolates in Mexico. Panels A and B illustrate the comparison of VK247_II and VK247_III patterns *versus* VK247_I. Concurrently, Panels C-F present the patterns of VK210b, VK210d, VK210g, and VK210h compared to VK210a, respectively. bp, base pairs; M, molecular marker; lines 1 and 3 show digestion with BstOI and lines 2 and 4 with AluI. The numbers inside gels indicate the estimated bp for each band.
