Figure. S1. PXRD patterns of Co(OH)_2 .

Figure. S2. Typical (a)TEM and (b) HRTEM images of Co(OH)_2 nanosheets.

Figure. S3. Raman spectrum of CeO₂.

Figure. S4. The crystal orbital Hamilton population between Ce and H atoms in the Co₃O₄-OV-Ce adsorbed propane system.

Table 1 Element compositions of the two catalysts analyzed by ICP technique.

| Samples | Co (at.%) | Ce (at.%) | Mg (at.%) |
|--|-----------|-----------|-----------|
| Co ₃ O ₄ @CeO ₂ -IE | 45.3 | 8.36 | 1.17 |
| Co ₃ O ₄ /CeO ₂ -IM | 45.4 | 8.38 | / |

Table 2 . The ration of Co, Ce and O ions from XPS.

| Samples | Co ²⁺ /Co ³⁺ (%) | Ce ³⁺ /Ce ⁴⁺ | O _{ad} /O _v /O _L (%) |
|--|--|------------------------------------|---|
| Co ₃ O ₄ @CeO ₂ -IE | 47.7/18.1 | 49.6/50.4 | 6/40.7/53.3 |

| | | | |
|--|-----------|-----------|-------------|
| Co ₃ O ₄ /CeO ₂ -IM | 42.1/21.5 | 28.6/71.4 | 8.4/25/66.6 |
|--|-----------|-----------|-------------|

Table 3. Catalytic performances of Co₃O₄@CeO₂-IE and Co₃O₄/CeO₂-IM catalysts.

| Samples | T ₅₀ | T ₉₀ | Reaction rate ^a |
|--|-----------------|-----------------|----------------------------|
| Co ₃ O ₄ @CeO ₂ -IE | 217 | 235 | 9.80 |
| Co ₃ O ₄ /CeO ₂ -IM | 268 | 348 | 6.91 |

^aThe feed gas was 0.5 vol% C₃H₈ and 21 vol% O₂, balanced with N₂, and T = 235 °C, GHSV = 60,000 mL h g⁻¹.
