Notes: * With preservative; ** without preservative; < LOD - Analyte concentrations were below detection limits; different letters on the same line represent statistical differences between samples ($p<0.05$) by one-way ANOVA with post hoc Tukey's test; P value in the line referring to the comparisons between the concentrations of lubricating eye drops for the elements Al, As, Ba, Cd, Co, Cr, Cu, Fe, Mn, Mo, Ni, Pb, Se, V and Zn ($p < 0.0001$), Cr and Mg ($p = 0.0001$).

Table S2. Statistical test used in view of the results of the Table 3 on values of daily instillation of lubricating eye drops.
