

Supplementary figures

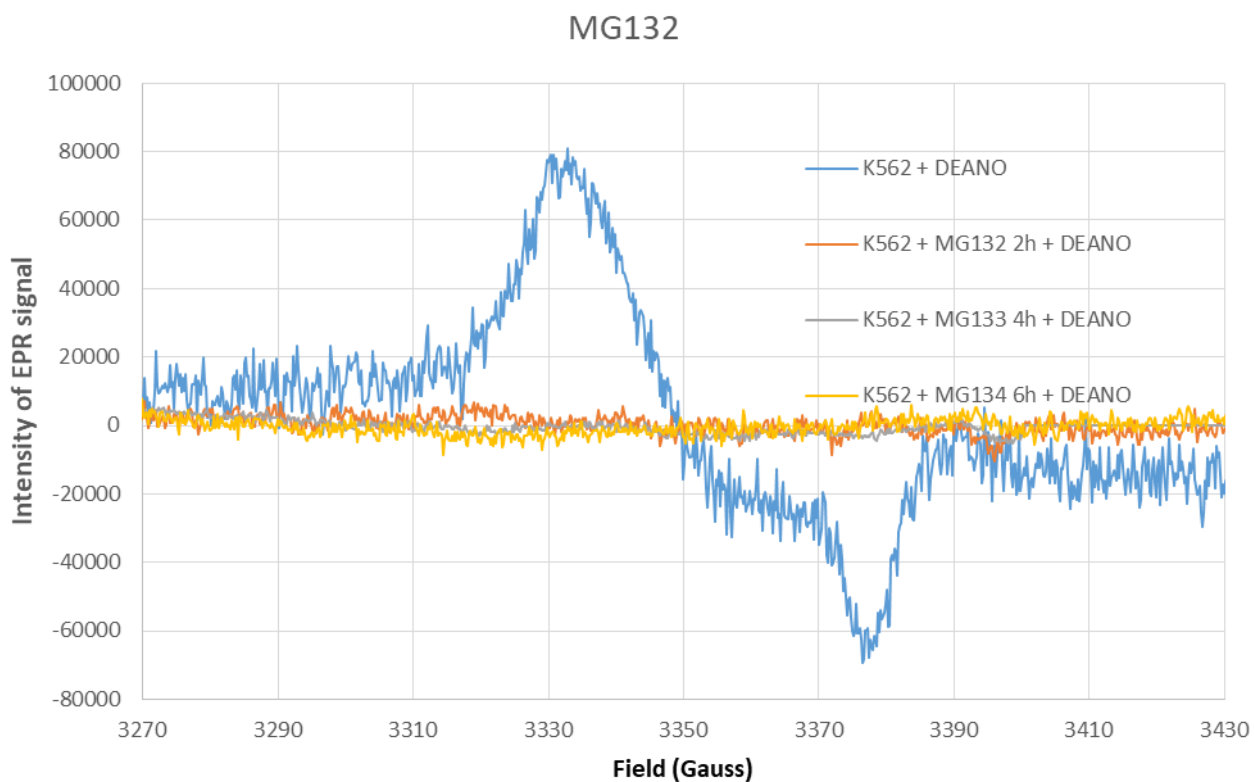

Supplementary Figure 1. Representative EPR spectra of K562 cells incubated with 50 μM ALLM for indicated time (0, 2, 4, 6 h) and then treated with 70 μM DEANO for 15 min at 37°C

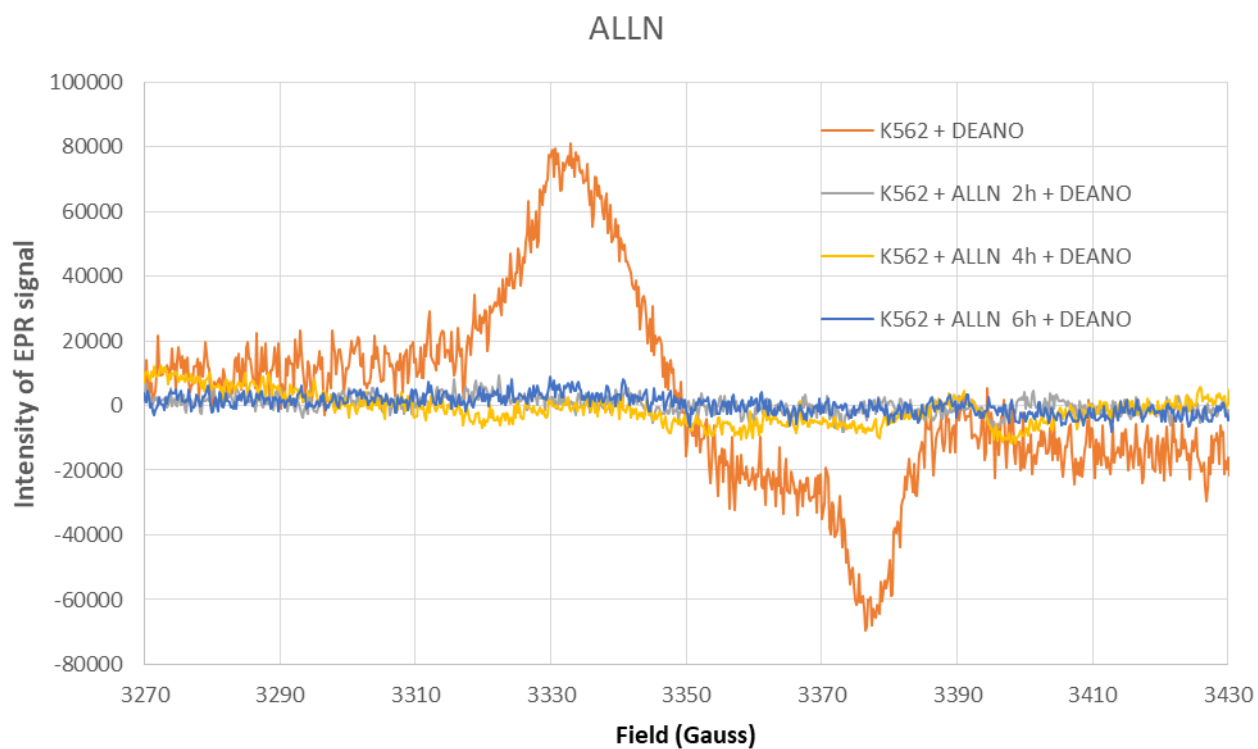

Supplementary Figure 2. Representative EPR spectra of K562 cells incubated with 100 μ M leupeptin for indicated time (0, 2, 4, 6 h) and then treated with 70 μ M DEANO for 15 min at 37°C

Supplementary Figure 3. Representative EPR spectra of K562 cells incubated with 20 μ M lactacystin for indicated time (0, 2, 4, 6 h) and then treated with 70 μ M DEANO for 15 min at 37°C

Supplementary Figure 4. Representative EPR spectra of K562 cells incubated with 25 μ M MG132 for indicated time (0, 2, 4, 6 h) and then treated with 70 μ M DEANO for 15 min at 37°C

Supplementary Figure 5. Representative EPR spectra of K562 cells incubated with 20 μ M ALLN for indicated time (0, 2, 4, 6 h) and then treated with 70 μ M DEANO for 15 min at 37°C
