<i>Npc1</i>	GCCGATTACCACACGCACCT	AACACAAGCCACACGGGAACAG	122

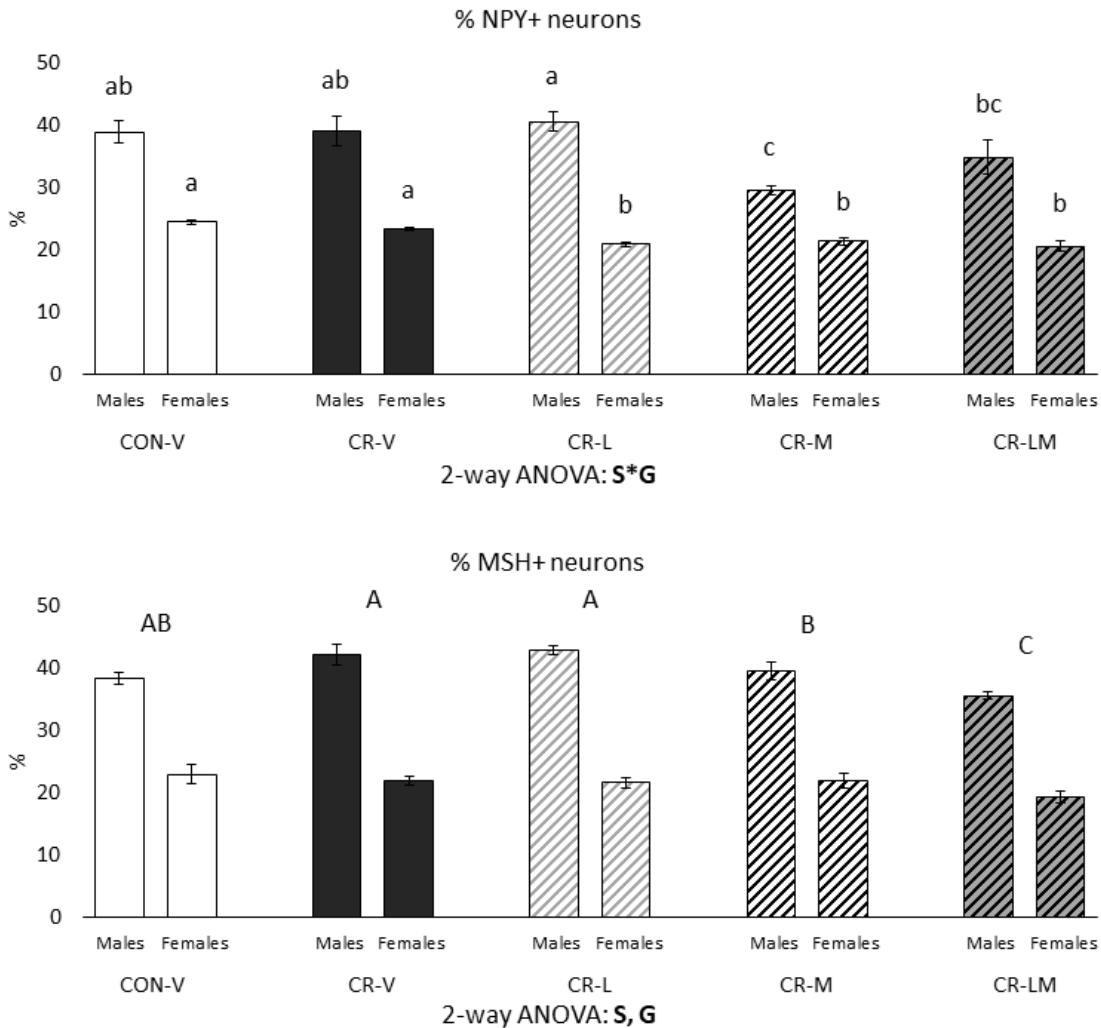

Table S2. Daily amounts of supplemented leptin and myo-inositol from day 1 to day 20 of lactation

<b>Day of lactation</b>	<b>Leptin (ng)<sup>1</sup></b>	<b>Myo-inositol (mg)<sup>2</sup></b>
1	1.0	0.43
2	2.0	0.85
3	3.0	1.28
4	4.0	1.70
5	5.0	2.13
6	6.3	2.67
7	7.5	3.20
8	8.8	3.73
9	10.0	4.26
19	11.3	4.80
11	15.6	5.33
12	17.2	5.86
13	18.8	6.39
14	20.3	6.93
15	21.9	7.46
16	23.5	7.99
17	25.0	8.52
18	26.6	9.06
19	39.4	9.59
20	43.8	10.12

Figure S1. Percentage of NPY and  $\alpha$ MSH positive neurons in the arcuate nucleus of the hypothalamus

Percentage of NPY and  $\alpha$ MSH positive (NPY+ and  $\alpha$ MSH+) neurons in the arcuate nucleus of the hypothalamus of 25-day-old male and female offspring of control (CON) and 25% gestational calorie-restricted (CR) dams. Data are means  $\pm$  s.e.m (n=4-6). Statistics: Two-way ANOVA was performed to assess the effects of sex and group (CON-V, CR-V, CR-L, CR-M and CR-LM). One-way ANOVA was carried out to determine differences between groups in each sex separately, when previous two-way ANOVA showed interactive effect between sex and group. ANOVA was followed by a least significant difference (LSD) post-hoc test. Symbols: S, effect of sex; G, effect of group; S\*G, interactive effect between sex and group; A $\neq$ B $\neq$ C ( $P<0.05$ , two-way ANOVA); a $\neq$ b $\neq$ c ( $P<0.05$ , one-way ANOVA). Abbreviations: vehicle (V), leptin (L), myo-inositol (M), leptin and myo-inositol (LM).
