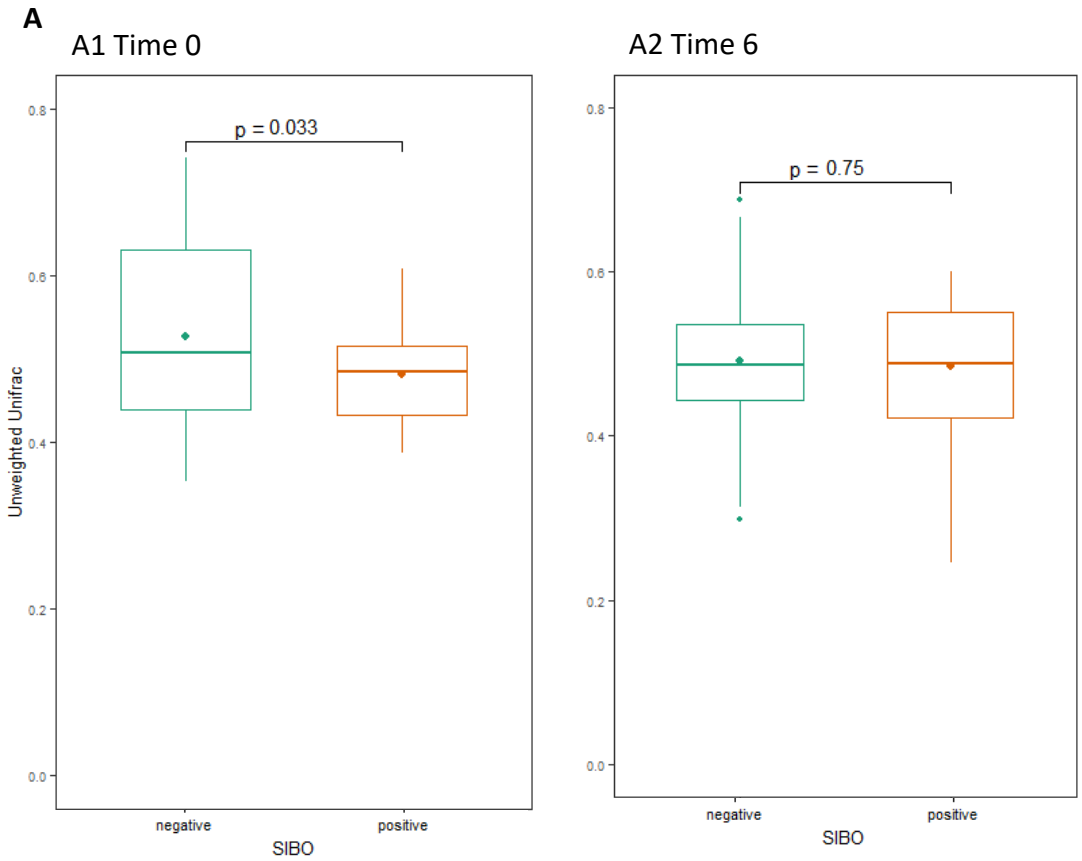

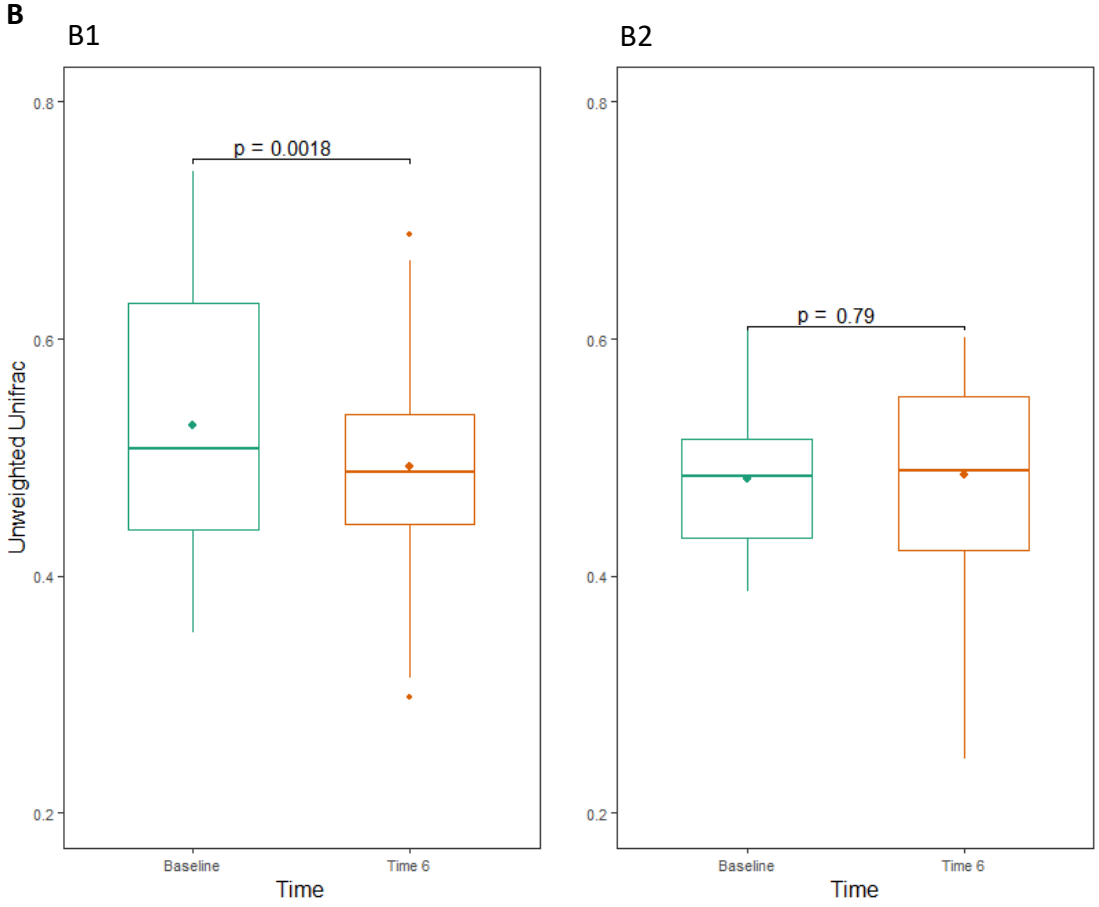

Figure S5: Differences in beta diversity (using the Unweighted Unifrac metric)

A: Between the group who did not develop SIBO at 6 months post-surgery (SIBO negative, n=17) and the group who develpoed SIBO at 6 months post-surgery (SIBO positive, n=10) at baseline (A1, Time 0) and 6 months post-surgery (A2, Time 6)

B: Within the group who did not develop SIBO at 6 months post-surgery (B1, n=17) and within the group who developed SIBO at 6 months post-surgery (B2, n=10)
