

A: α SMA expression in CCD18Co (positive control) , Caco-2, HCT-8 and HT-29 in response to TGF β for 24, 48 and 56h.

B: CTGF and COL1A1 mRNA levels in Caco-2 cells in response to TGF β .

C: Total proteins gels from CCD18-CO, Caco-2, HCT-8 and HT-29 samples used in panel A.
