Abbreviations: European Prospective Investigation into Cancer and Nutrition (EPIC), Lower Bound (LB), Middle Bound (MB), Renal Cell Carcinoma (RCC). The variables in bold show that a large part of the EPIC population is exposed to some of the main mycotoxins present in European foods such as DON and derivatives, fumonisins, Fusarium toxins, Alternaria toxins and total mycotoxins.

Table S2. Percentage (%) of the EPIC population with external mycotoxin exposures assessed based upon dietary questionnaire data below and above the safety reference values set by EFSA.
