Y = Yes, P = Partially, U = Unclear, N = No explicit statements in the body of the text to provide evidence for each question below

1. Did the research respond to a need or priority determined by the community?
2. Was community consultation and engagement appropriately inclusive?
3. Did the research have First Nations research leadership?
4. Did the research have First Nations governance?
5. Were local community protocols respected and followed?
6. Did the researchers negotiate agreements in regards to rights of access to existing First Nations peoples' intellectual and cultural property?
7. Did the researchers negotiate agreements to protect First Nations peoples' ownership of intellectual and cultural property created through the research?
8. Did First Nations peoples and communities have control over the collection and management of research materials?
9. Was the research guided by an Indigenous research paradigm?
10. Does the research take a strengths-based approach, acknowledging and moving beyond practices that have harmed First Nations in the past?
11. Did the researchers plan to and translate the findings into sustainable changes in policy and/or practice?
12. Did the research benefit the participants and First Nations communities?
13. Did the research demonstrate capacity strengthening for First Nations individuals?
14. Did everyone involved in the research have opportunities to learn from each other?
