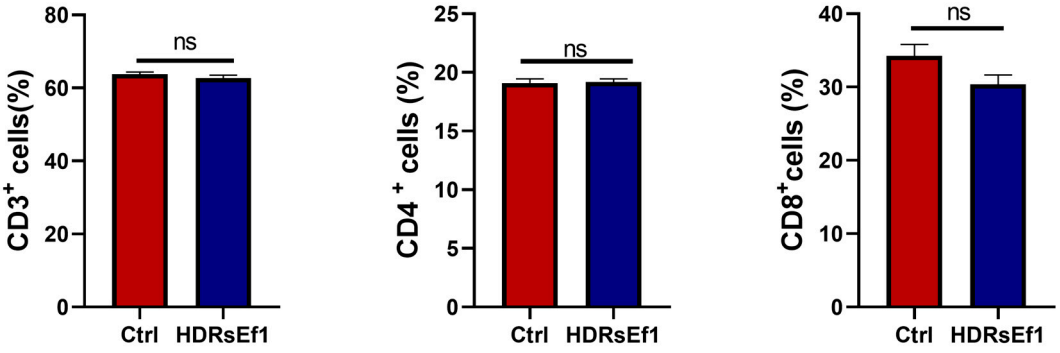

Figure S1. Effects of HDRsEf1 on spleen T lymphocyte populations. Proportion of $CD3^+$ cells, $CD4^+$T cells and $CD8^+$T cells in $CD45^+$ cells in the spleen of control and HDRsEf1-treated animals were determined by flow cytometry. Data are representative of two independent experiments with n = 7–8 as mean ± SEM. Student's t-test, ns, non-significant.
