

Figure S1. The composition of WPH. (A) The proportion of parent protein for WPH. (B) The peptide profile of the most abundant albumin in WPH. (C) The best unique peptide-spectrum matches (PSM).

Table S1. Disease Activity Index score

| Score | Weight loss rate (%) | Stool properties | Fecal occult blood |
|-------|----------------------|------------------|--------------------|
| 0 | 0 | Normal | Negative |
| 1 | 1-5 | Weak soft stool | Weak positive |
| 2 | 6-10 | Soft stool | Positive |
| 3 | 11-15 | Mucus-like stool | Strong positive |
| 4 | >15 | Watery stool | Blood fecal stool |
