Supplementary Figure S1. PfAP2-06B occupancy at representative *apiap2* genes and invasion genes. (A): PfAP2-06B binding *apiap2* genes profiles across the schizont stage[1], including Reads per Kilobase of sequence per Million mapped reads of ChIP, Reads per Kilobase of sequence per Million mapped reads of input, and log2-transformed ChIP/input fold enrichment. (B) PfAP2-06B binding representative invasion genes profiles across the schizont stage[1], including Reads per Kilobase of sequence per Million mapped reads of ChIP, Reads per Kilobase of sequence per Million mapped reads of input, and log2-transformed ChIP/input fold enrichment.
