# Optimization of long-acting bronchodilator dose ratios using isolated guinea pig tracheal rings for synergistic combination therapy in asthma and COPD

**Table S1:** Percentages of tracheal relaxation obtained with increasing percentages of the vehicle DMSO.

	Relaxation (%E <sub>max</sub> of 1 mM atropine on contraction by 10 $\mu$ M MCh)							
DMSO (%)	0.00000025	0.0000025	0.000025	0.00025	0.00075	0.0025	0.025	0.25
Mean relaxation (%)	2	6	9	13	6	18	21	21
SD (%)	2	3	6	7	8	8	9	9
SEM (%)	1	1	2	3	3	3	4	4
NB	6	6	6	6	6	6	6	6
