

Supplementary Materials: Enhanced Dissolution of Naproxen by Combining Cocrystal-li-zation and Eutectic Formation

Hak Yeong Kim, Soeun Jang and Il Won Kim

Figure S1. DSC thermograms of (a) NPX/NA, (b) NPX/PA, and (c) NPX/INA mixtures.**Figure S2.** XRD patterns of some mixtures of (a) NPX/NA, (b) NPX/PA, and (c) NPX/INA.**Figure S3.** DSC thermograms of melt crystallized cocrystals of (a) NPX/NA, (b) NPX/PA, and (c) NPX/INA.

Figure S4. Full dissolution profiles (120 min, $n = 3$) of NPX/NA and NPX/PA in (a) pH 5.0 buffer and (b) FeSSIF.
