

Supplementary Materials: Population Pharmacokinetics of Amikacin in Patients on Veno-Arterial Extracorporeal Membrane Oxygenation

Claire Pressiat, Agathe Kudela, Quentin De Roux, Nihel Khoudour, Claire Alessandri, Hakim Haouache, Dominique Vodoval, Paul-Louis Woerther, Alice Hutin, Bijan Ghaleh, Anne Hulin, Nicolas Mongardon

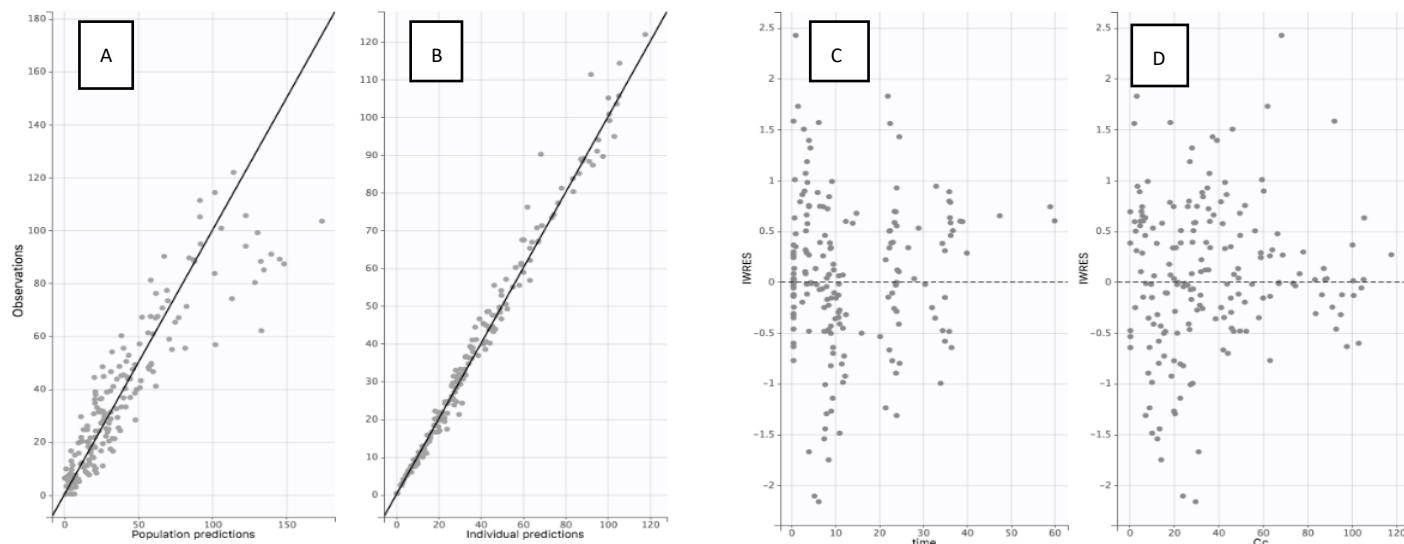

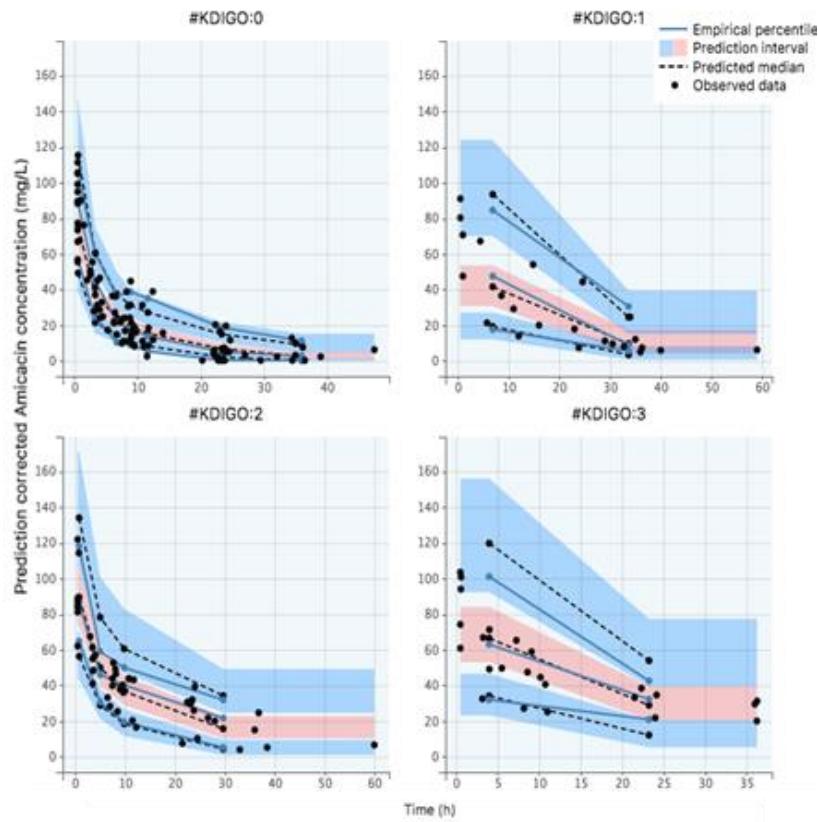

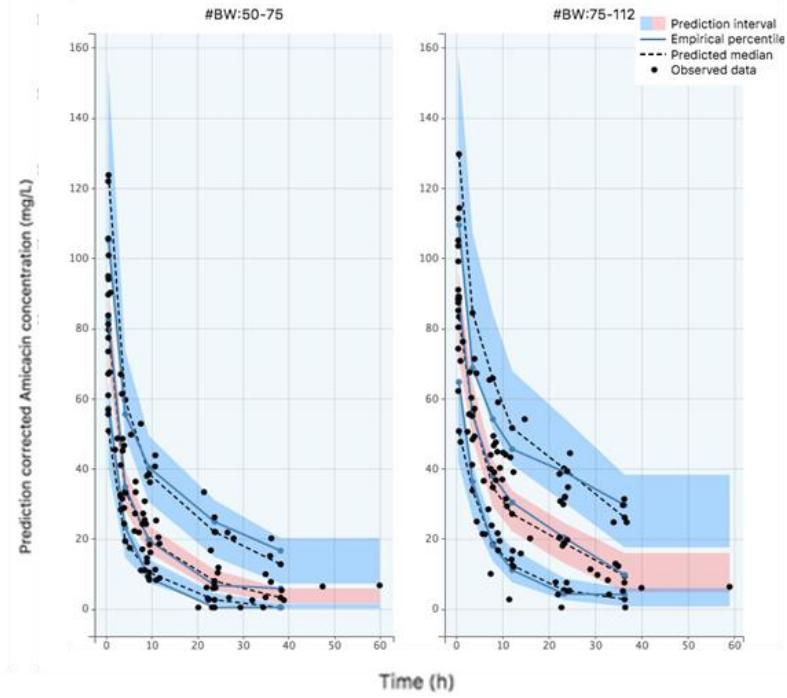

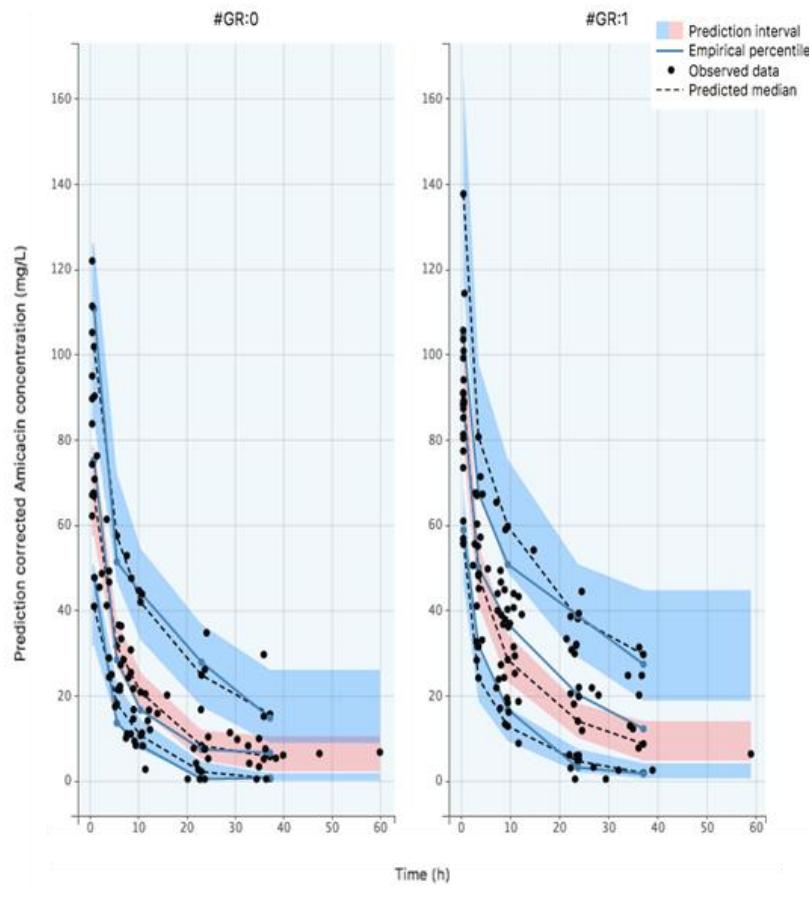

Figure S1. Diagnostics plots of final model: (A). Observed concentrations *vs* predicted concentrations of populations; (B). Observed concentrations *vs* individual predicted concentrations; (C). Individual weighted residues (IWRES) in time; (D). Individual weighted residues (IWRES) *vs* observed concentrations (Cc).

(A)

(B)

(C)

Figure S2. PC-VPC of final model: Depending on the KDIGO stage (A). Depending on the TBW range (B). Depending on the absence or presence of V-A ECMO support (GR = 0 for control, GR = 1 for V-A ECMO) (C).
