

Field	Classifications	Description
ID	100 to 2030 (10-in-10 intervals)	Unique identification number for each project
Type of consulted document	Mobile Applications (Apps); Peer reviewed divulgation articles; Peer reviewed scientific articles; Articles or presentations at scientific meetings or congresses; Description of funded projects; e-books/Gazettes/Newsletters; Media news (on projects); Websites; Technical reports; Theses	Apps: Applications for mobile phones; Peer reviewed divulgation articles: Articles addressing the current state of understanding of a topic or articles ensuring dissemination on a topic to a general public; Peer-reviewed scientific articles: Published scientific articles where the results of a research are communicated; Articles or presentations at scientific meetings or congresses: Congress reports, conference agendas, articles published in journals or compendiums of congresses, meeting abstracts; Description of funded projects: Institutional projects that were financed throughout the public or private sector; e-books/Gazettes/Newsletters: Documents without peer-review process published from an institution or organization; Media news (on projects): Notes in the media (websites, newspapers, magazines, radio, etc.) related to a past or ongoing project; Web pages: online sites of NGOs, businesses, government agencies, etc.; Technical Reports: Documents without peer review that describe the process and/or results of a project; Thesis: Undergrad or graduate level thesis.
Project name	NA	Name of the project or initiative

Name of investigators or leads and main collaborators of the project	NA	PI or leads and collaborators of the project or initiative
N° of participants	NA	Total number of PI, leads and collaborators of the project or initiative
Sector	Government sector; Dependencies abroad; Academic sector; Private sector; Civil society	Government sector: includes agencies at the municipal, state, and federal levels; Dependencies Abroad: Institutions or organizations headquartered outside of Mexico that conduct research or carry out initiatives on the Mexican coasts; Academic sector: includes public and private universities, research centers, institutes, research consortia, etc.; Private sector: includes companies, hotels, banks, etc.; Civil society: includes NGOs, external consultants, civil associations, non-profit associations, etc.
Institution	NA	Name of the institution or organization responsible for the project or initiative
Project description	NA	Short description of the project or initiative
Start date	2010-2021	Start date of the project or initiative. If it is not specified, and in applicable cases, it is taken as the year in which field work activities (surveys, harvest, etc.) started
End date	2010- To date	If not specified, and in applicable cases, the year of project completion is taken as the date of publication

Estimated project duration (years)	Minimum 1 year, maximum is variable	Total duration in years of a project, from its inception to its completion. If this period is not specified, the "start date" and "end date" fields are used to estimate it
Estimated date of publication/delivery of results	2010-2021	Estimated date of publication or presentation of results (the most recent one is considered). This date is used to assign a specific year to each project for subsequent analysis.
Study site	NA	State, municipality, town or beach defined as study site
Strategic line of the CONACYT Agenda	Origin and ecological importance; Monitoring, modeling and early warning; Socio-economic and environmental impacts; Containment, harvest, and disposal; Potential uses; Restoration; Regulations; Communication and education; International cooperation	The projects or initiatives are assigned to one of the nine strategic and multidisciplinary lines of the CONACYT Agenda ( <a href="https://conacyt.mx/sargazo/images/Agenda/2020/Agenda_Conacyt_Sargazo-2020_.pdf">https://conacyt.mx/sargazo/images/Agenda/2020/Agenda_Conacyt_Sargazo-2020_.pdf</a> )
Objectives	NA	Project or initiative objectives that are described or that can be inferred based on the content of the document
Main results and conclusions	NA	Short description of the most relevant results of the project or initiative
Publications and available databases	NA	Bibliographic references and databases (i.e., websites) where information can be found and/or downloaded

Institutional collaborations	NA	All those institutions and organizations that collaborated in a project or initiative. Outside the academic sector, it is specified if the collaboration comes from another sector (government, dependencies abroad, civil society or private sector). If the collaborations are not specified in the document, the co-authors or collaborators affiliation's organization is considered as the collaborating institution. In addition to this affiliation, in applicable cases, the acknowledgments section is reviewed to extract other possible collaborations that directly influenced the development of the project.
N° collaborations per project	NA	Total number of collaborations identified for a project or initiative
N° of national collaborations	NA	Total number of national (i.e., Mexico) collaborations identified in a project or initiative
N° of international collaborations	NA	Number of international (i.e., not Mexico) collaborations identified in a project or initiative
General comments	NA	Other web pages or additional links to related documents of the project or initiative

Funds (\$)	NA	Total amount (\$) awarded to a project or initiative
Patents	Minimum 0, variable maximum	Total number of patents either in process or already granted.
