

Supplementary Table S1. Content of anthochlors and flavonoids, quantified as aglycones after acidic hydrolysis, in *B. ferulifolia* cultivars. Subtotals for anthochlors and each flavonoid class are shown. The column 'Total' includes anthochlors, flavones, anthocyanins and dihydroflavonols. All measurements are given in µg/g fresh weight. Same letters (a-l) indicate no statistically significant differences according to Duncan (p<0.05) between different varieties, n.d.: not detected.
