Supplemental Material

Title: Schematic overview of the experimental setup

Authors: Jon Niklas Henningsen · Bruno Maximilian Görlach · Victoria Fernández · Jasper Lauritz Dölger · Andreas Buhk · Karl Hermann Mühling

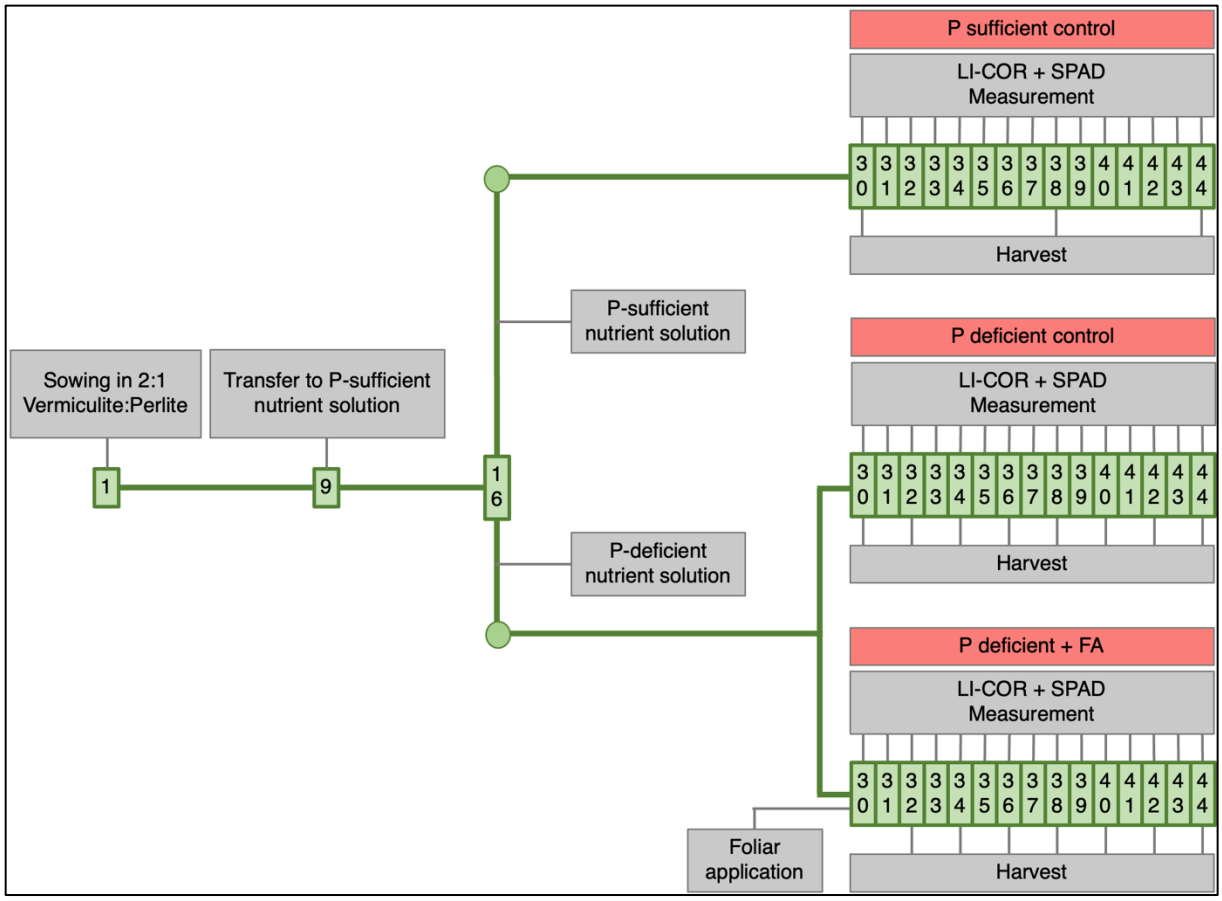

Figure S1. Schematic representation of the set-up from the 1st experiment. Multiple analytical measurements were performed on three treatments: P sufficient control, P deficient control, and P deficient + FA (foliar application). The numbers given in the green boxes indicate the days after sowing (DAS)
