

Figure S1. Dynamics of weight in potted *Rabdosia rubescens* seedlings exposed to combined LED spectra and drought stress. A column presents an average of eight replicates (tanked pots of seedlings) and error bars mark standard errors. Different letters indicate significant difference according to Tukey test at 0.05 level in a sampling day. Red, Blue, and Green are abbreviations of LED light colors; Ctrl, a well-watered control; Drought, drought stress. Days mark post-transplant periods.
