

Supplementary Material

The following Supporting Information is available for this article:

Supplementary Figure S1. Base quality analysis of clean reads for sequencing library of LCK_a (a), LCK_b (b), LCK_c (c), LT1_a (d), LT1_b (e), LT1_c (f), LT2_a (g), LT2_b (h) and LT2_c (i). LCK, control; LT1, salinity treatments for 1 d; LT2, salinity treatments for 28 d. a, b, c represent the three repetitions.

Supplementary Figure S2. Pearson correlation analysis between samples based on gene expression profiles. LCK, control; LT1, salinity treatments for 1 d; LT2, salinity treatments for 28 d. a, b, c represent the three repetitions.

Supplementary Table S1. The primer sequences used for quantitative real-time PCR (qRT-PCR) analysis.
