Supplementary material

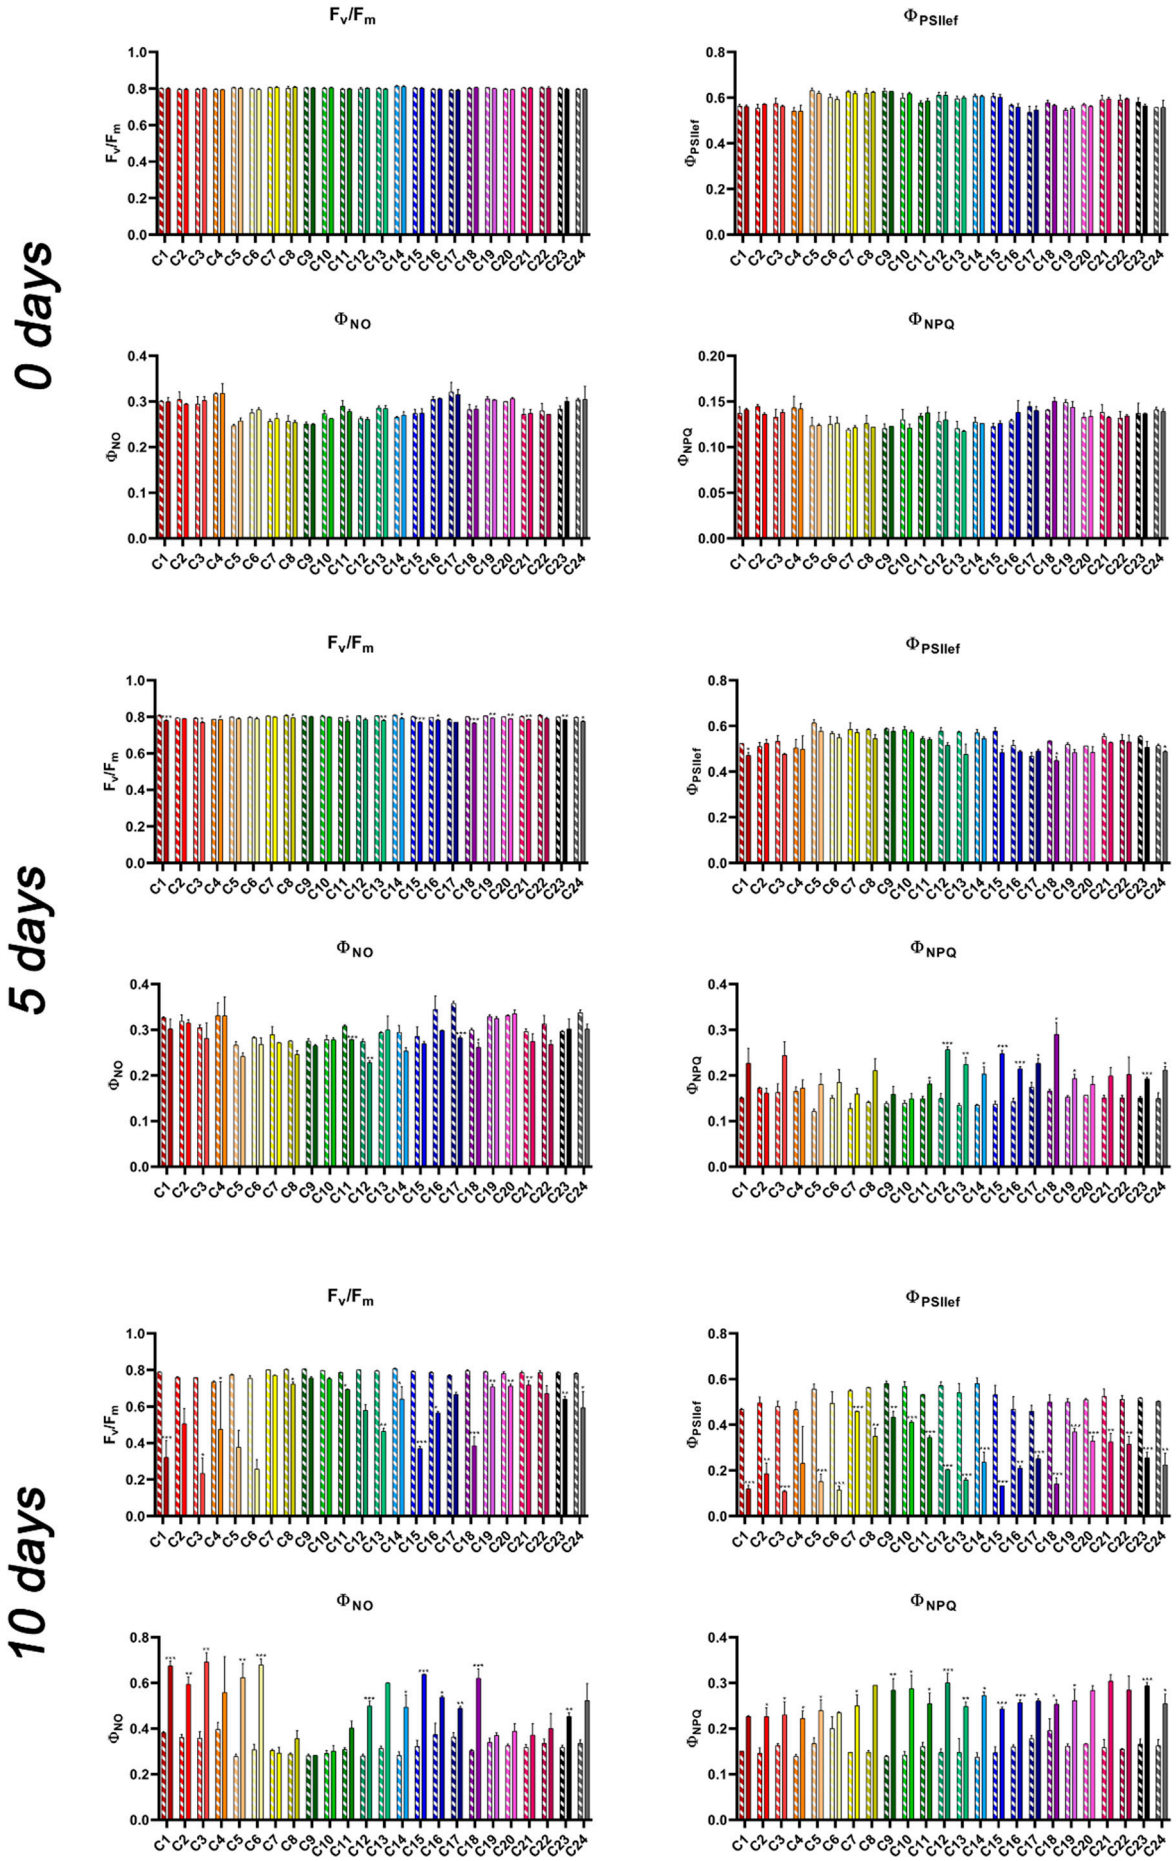

Figure S1. ChlF parameters of wheat seedlings of CC (shaded bars) and DS (solid bars) groups at different days after stopping the irrigation. Data are presented as mean ± SEM.

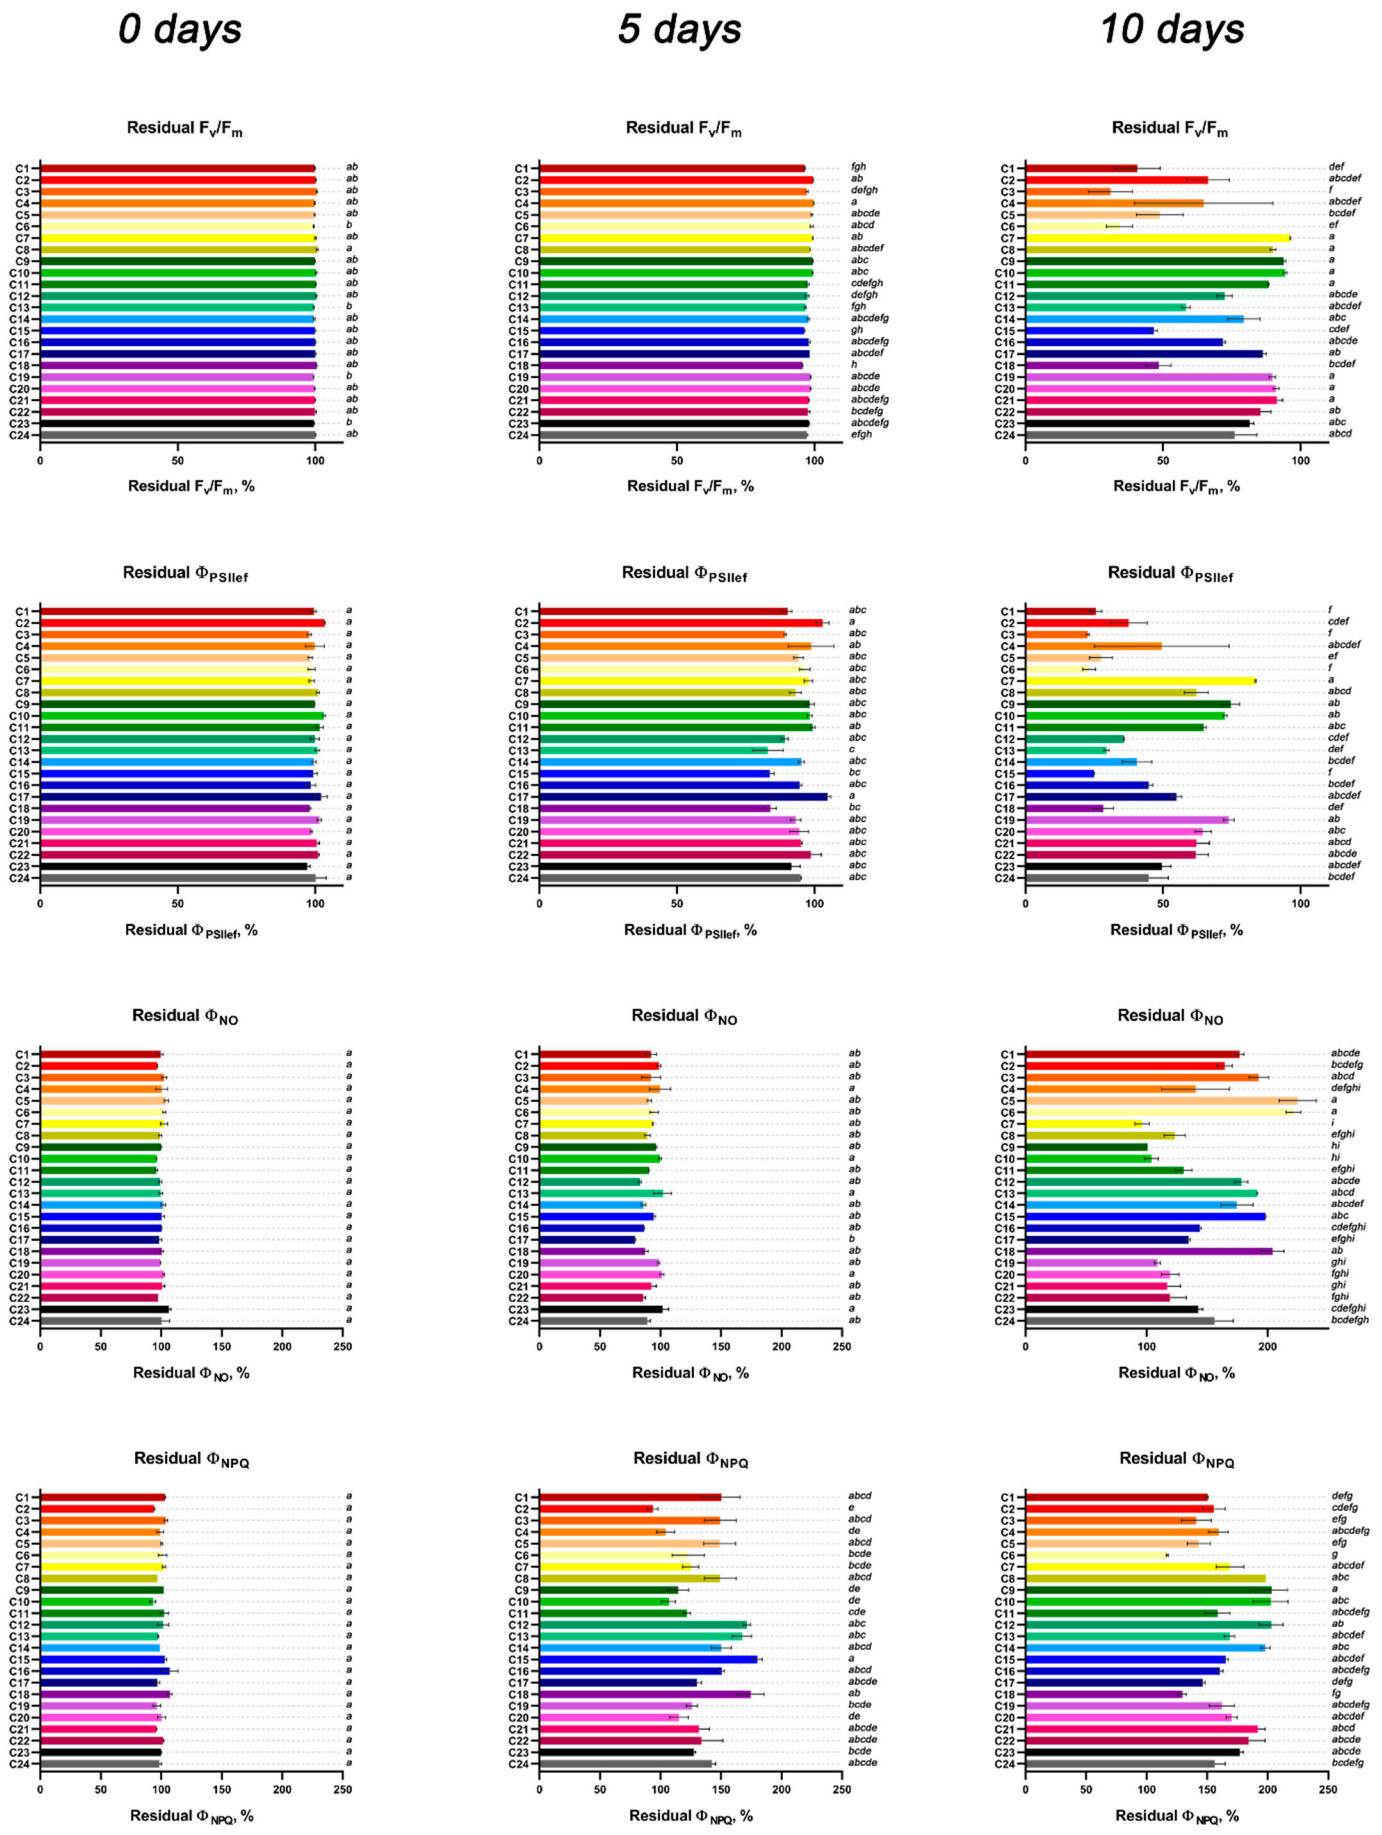

Figure S2. The residual values of ChlF parameters of wheat seedlings at different days after stopping the irrigation. Data are presented as mean ± SEM.

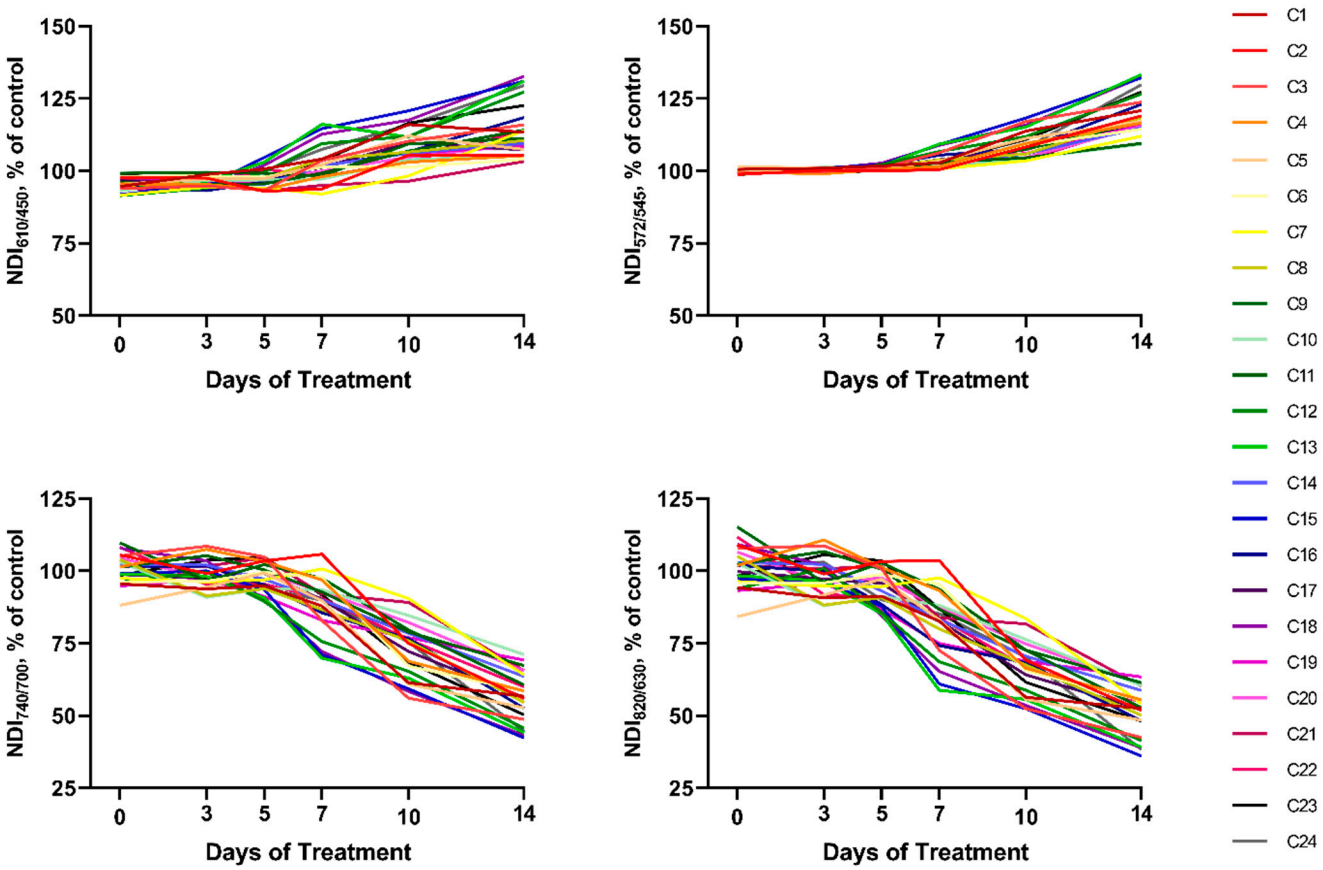

Figure S3. Drought-induced dynamics of NDIs of DS wheat plants (in % of control). Data are presented as means for each cultivar.
