

Supplement Figure S1. Evolutionary analysis of the U-box in CsPUBs.
The sequences in the figure are based solely on protein sequences containing the U-box portion.

Supplement Figure S2. Statistical analysis of the number of *cis*-acting elements of *CsPUBs.*

Statistics on the number of cis-acting elements in *CsPUBs*, where blue represents plant hormone responsiveness elements, green represents growth and development-related elements, orange represents stress responsiveness-related elements, red represents light responsiveness elements, and purple represents elements with other functions.
