Supplementary Materials

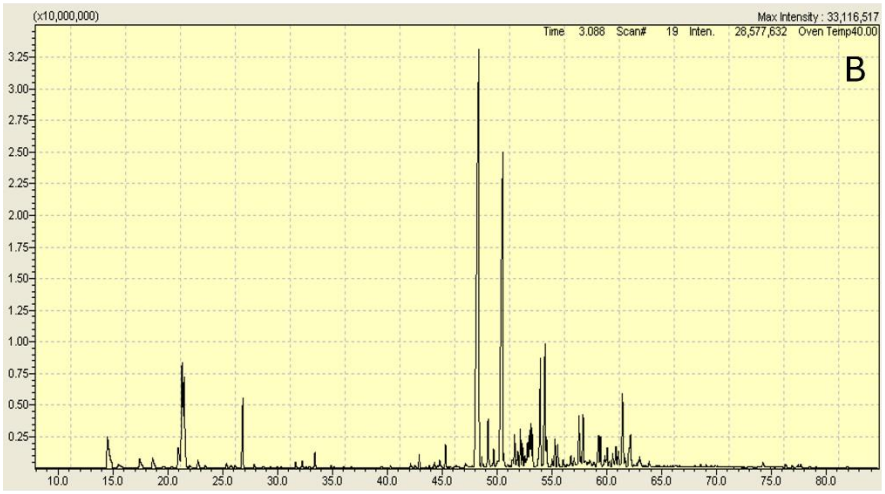

Figure S1. GC-MS chromatograms (A, B, and C) of *Helichrysum manopappoides* Humbert essential oil. A, B, and C are chromatograms obtained by injecting three aliquots of Helichrysum manopappoides and analyzing them separately under the same experimental gas chromatographic conditions (three separate analyses).

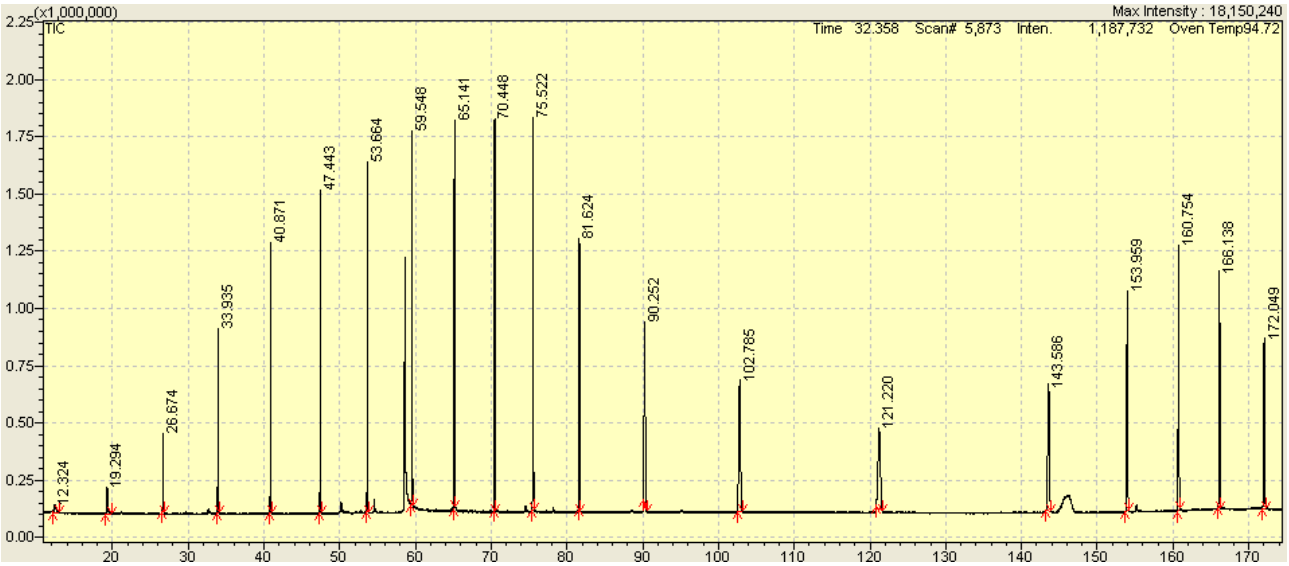

Figure S2. GC-MS chromatogram of pure *n*-alkanes (C_7-C_{30}).
