

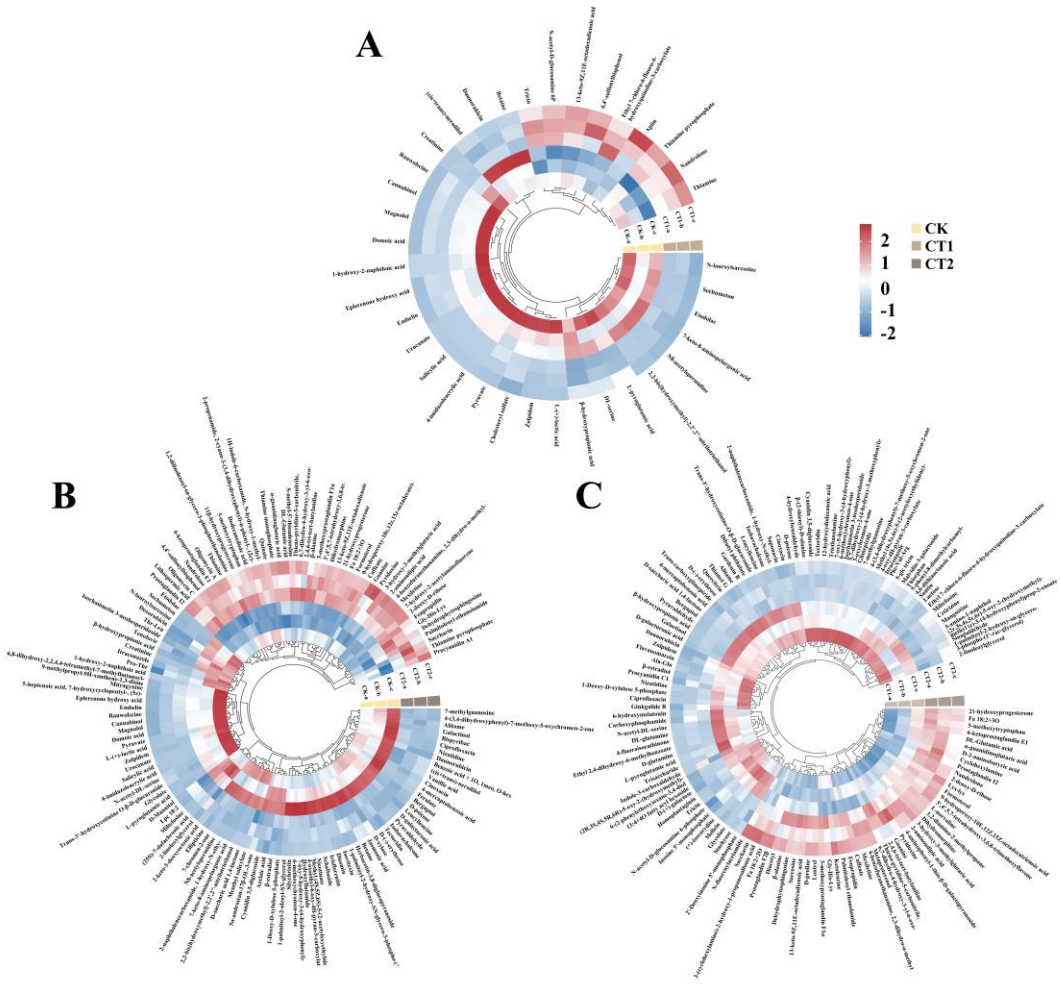

Figure S1. Hierarchical Cluster of DIMs in *Salix viminalis* roots under Cd stress. Note: (**A**) CK versus (vs.) CT1; (**B**) CK vs. CT2; (**C**) CT1 vs. CT2. Each plot indicates DIMs among comparison groups according to the *P* value ($P < 0.05$). "CK" indicates Cd-free, "CT1" indicates the willow were exposed to Cd stress for 12 hours, "CT2" indicates the willow were exposed to Cd stress for 36 hours.
