

Supplemental Figure S1. Loss of *DIV1* function does not alter leaf phenotype.

Supplemental Figure S2. RT-qPCR analysis of the expression of *NAC59* and *NAC92* in the *DIV1-OE#6* and wild type (WT) leaves. Results were normalized against the expression of *EF1αA4* as an internal control. Values are means ± SD (n = 3). Asterisks indicate significant differences compared with the wild type (two-tailed paired Student's *t* test, P ≤ 0.05).
