

SUPPORTING INFORMATION

Polymer-doped SnO₂ as an Electron Transport Layer for High-efficient and Stable Perovskite Solar Cells

Vo Pham Hoang Huy and Chung Wung Bark*

*Department of Electrical Engineering, Gachon University, Seongnam 13120, Gyeonggi,
Republic of Korea;*

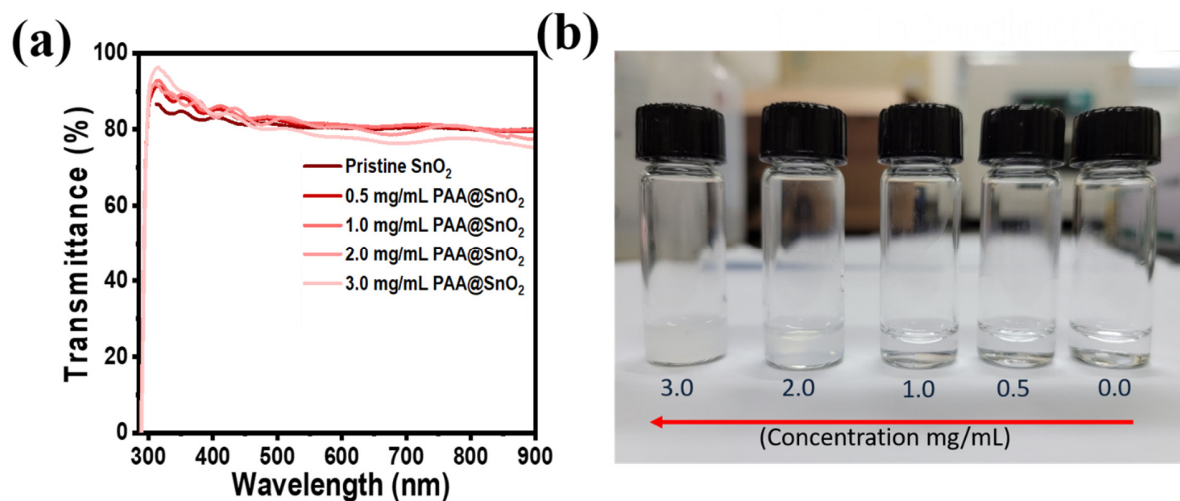

Fig. S1. (a) Transmission spectra of 0, 0.5, 1, 2, and 3.0 mg mL^{-1} of PAA@SnO_2 films coated onto FTO substrates. (b) Digital images of SnO_2 and different concentrations of PAA@SnO_2 precursor solutions.

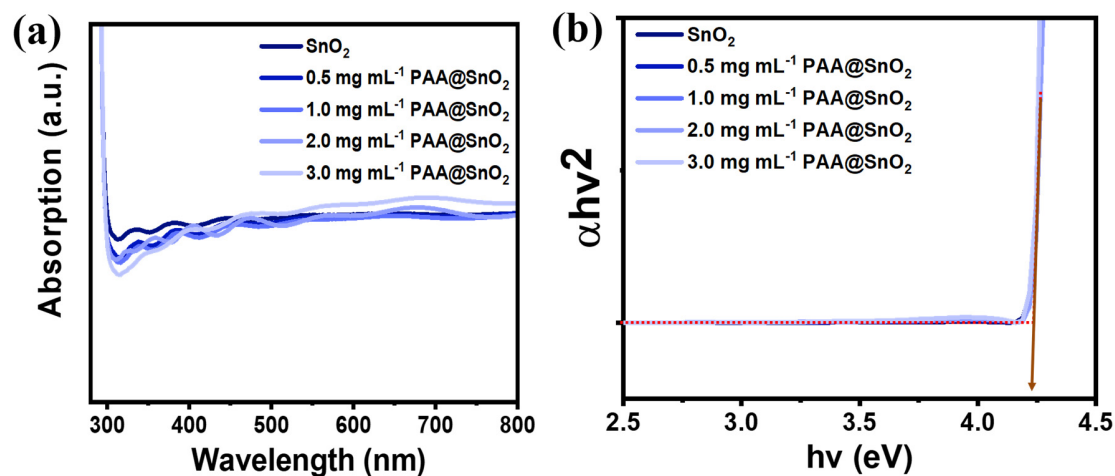

Fig. S2. (a) UV-Vis spectra of 0, 0.5, 1, 2, and 3.0 mg mL^{-1} of PAA@SnO_2 films coated on FTO substrates. (b) Tauc plot for PAA@SnO_2

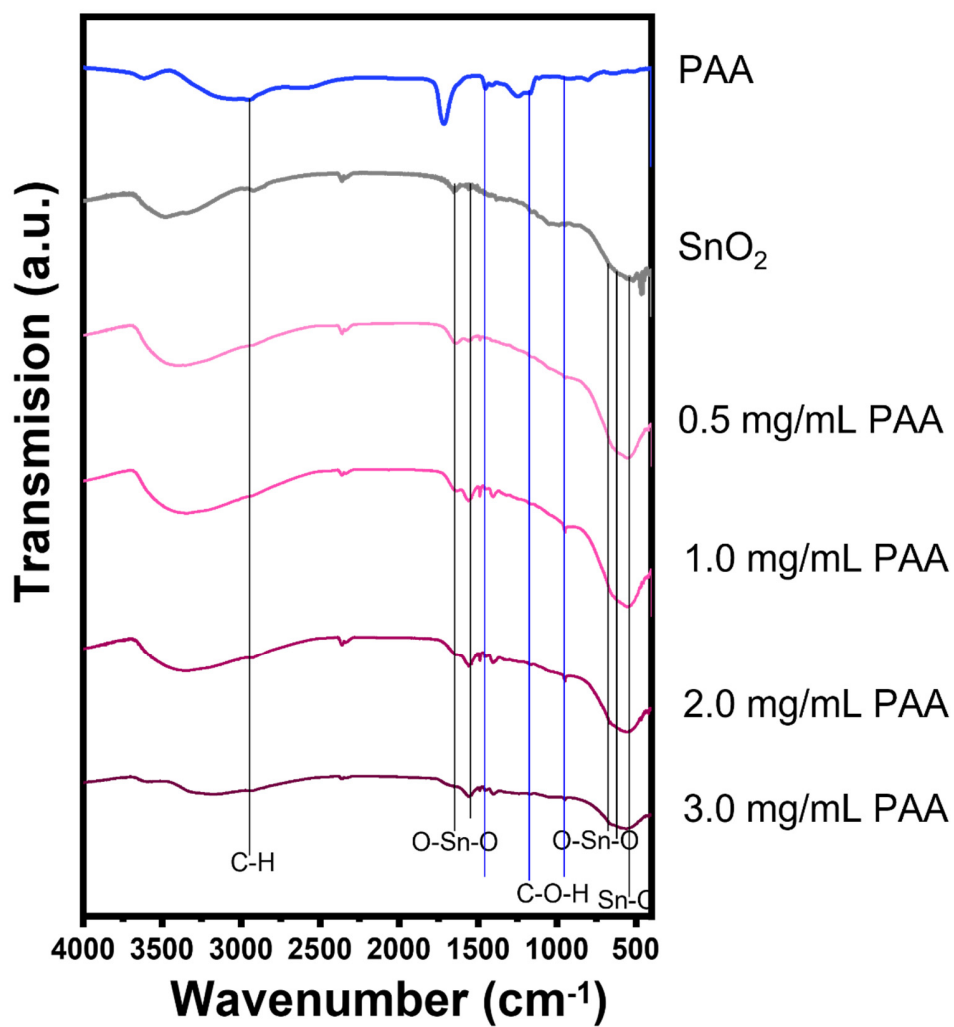

Fig. S3. FT-IR spectra of PAA, SnO₂, and PAA@SnO₂ at different concentrations before annealing.

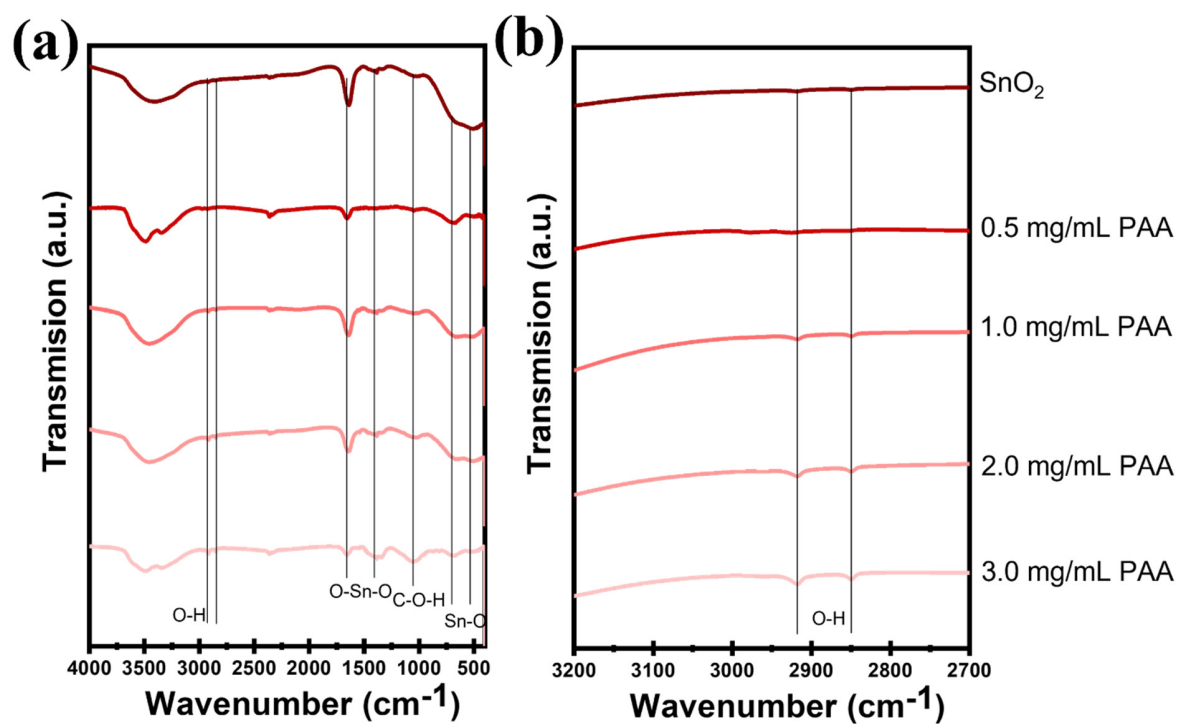

Fig. S4. FT-IR spectra of PAA, SnO₂, and PAA@SnO₂ at different concentrations after annealing.

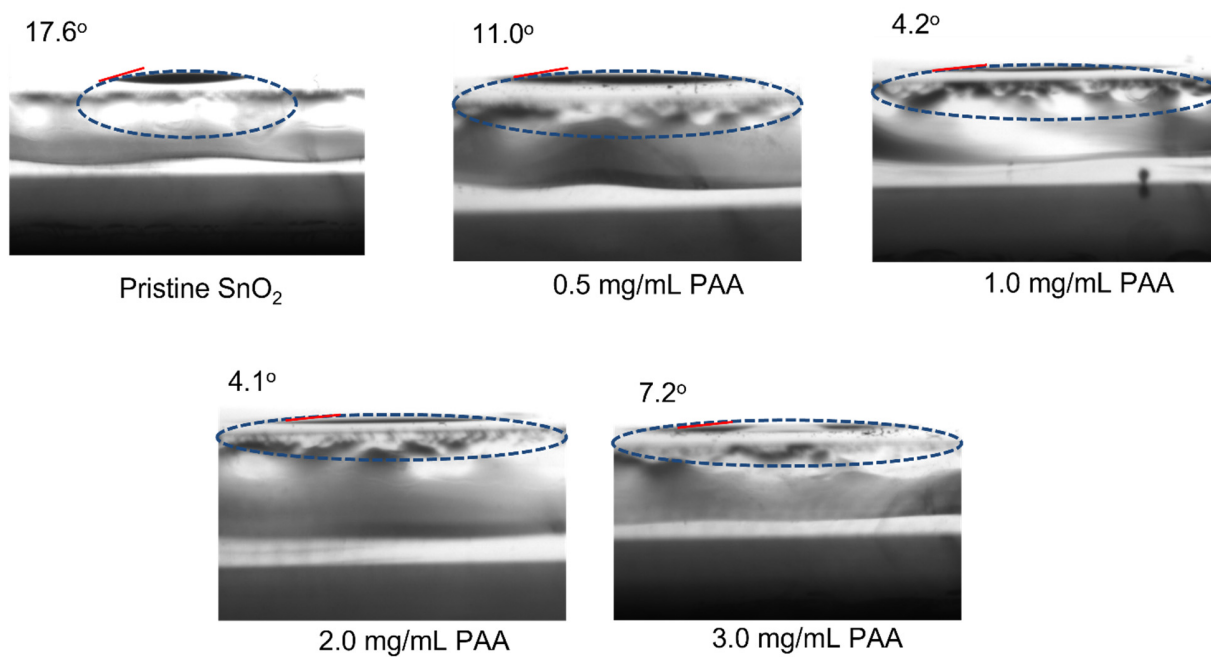

Fig. S5. Contact angle measurements of the SnO₂ films without and with different concentrations of the PAA polymer.

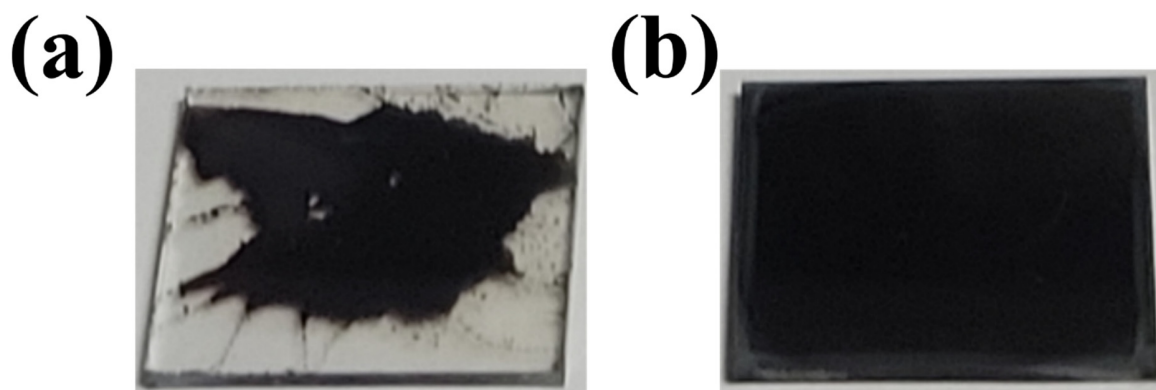

Fig. S6. Photograph of the perovskite film on (a) SnO_2 with the UV treatment and (b) PAA@SnO_2 with PAA concentration of 1 mg/mL substrate without the UV treatment.

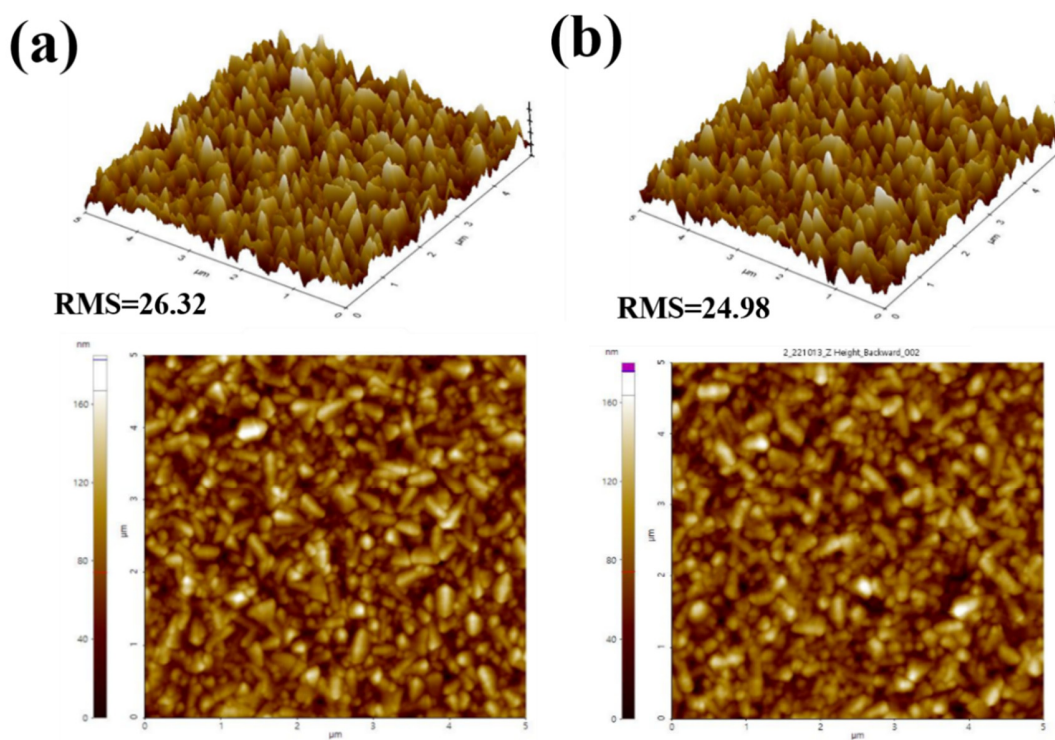

Fig. S7. AFM images of (a) SnO_2 and (b) PAA@SnO_2 layers.

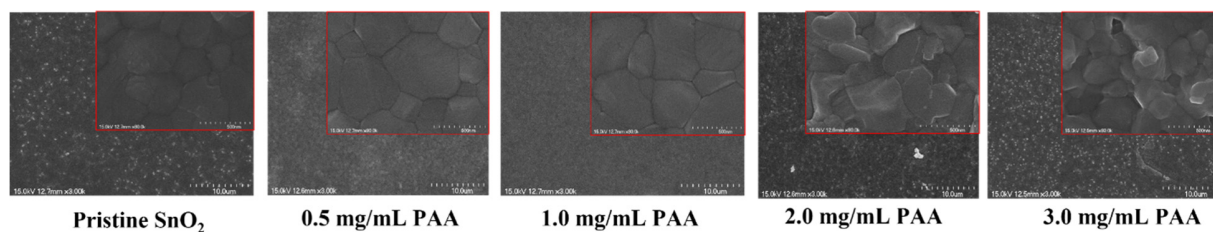

Fig. S8. SEM image of the perovskite films grown on pristine SnO₂ and PAA@SnO₂ at various concentrations.

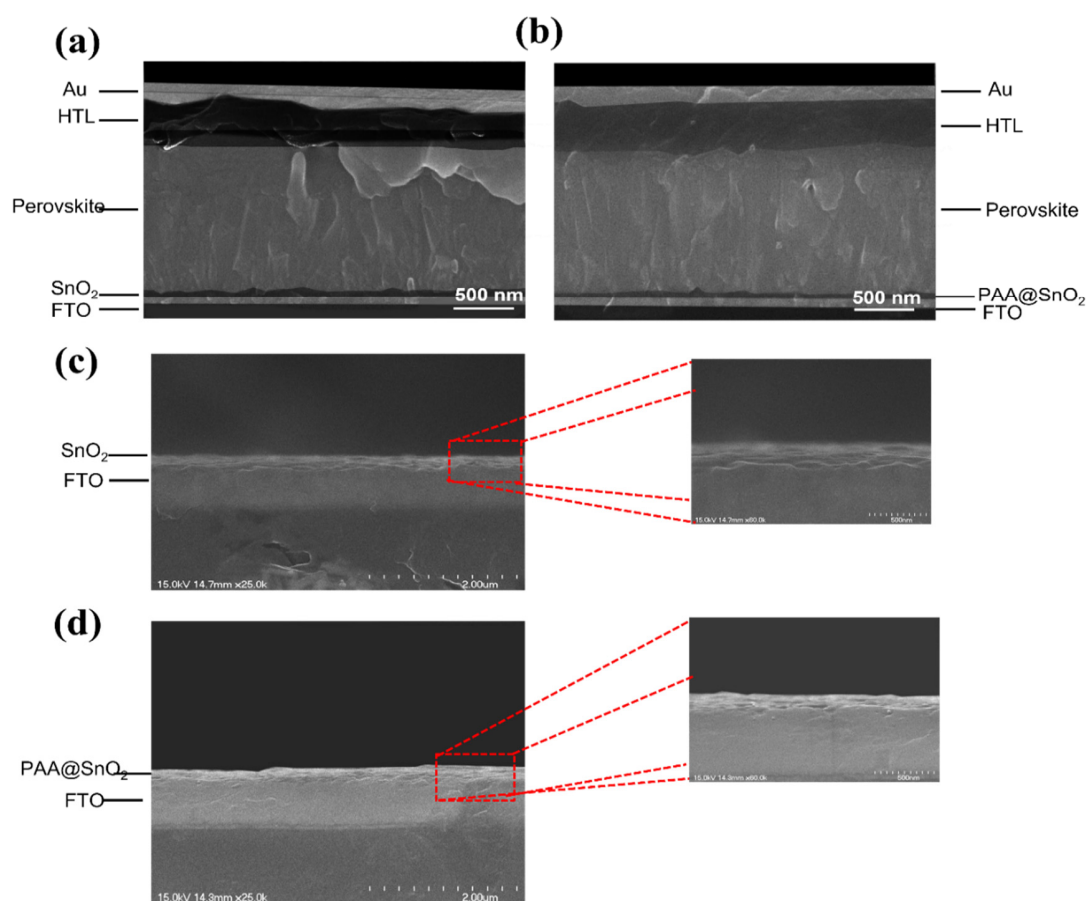

Fig. S9. Cross-section SEM images of (a) pristine SnO₂ and PAA@SnO₂ device structure. Cross-section SEM images of ETL with (a) pristine SnO₂ and PAA@SnO₂.

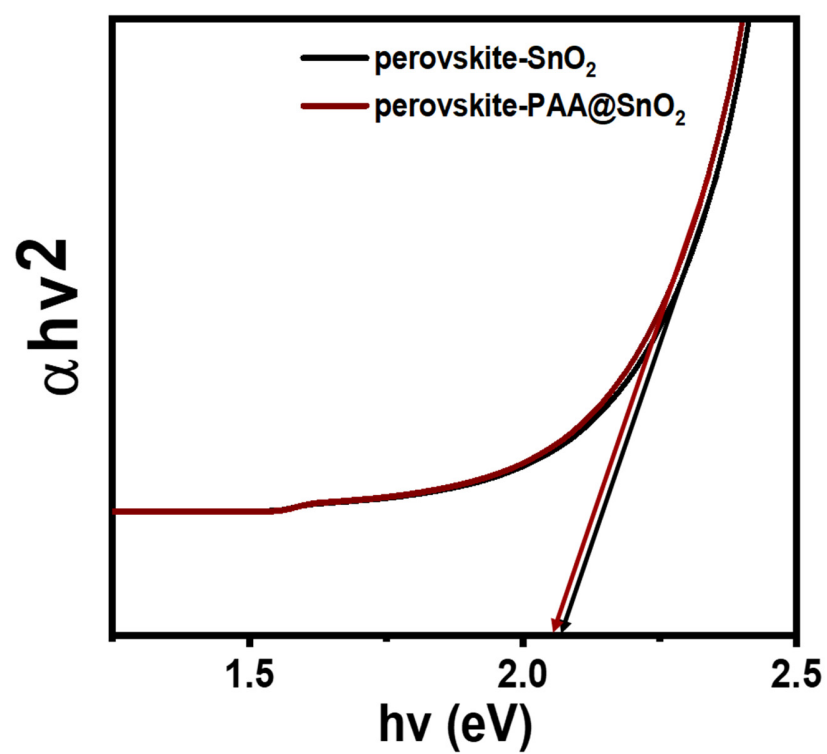

Fig. S10. Tauc plot for perovskite on SnO₂ and PAA@SnO₂

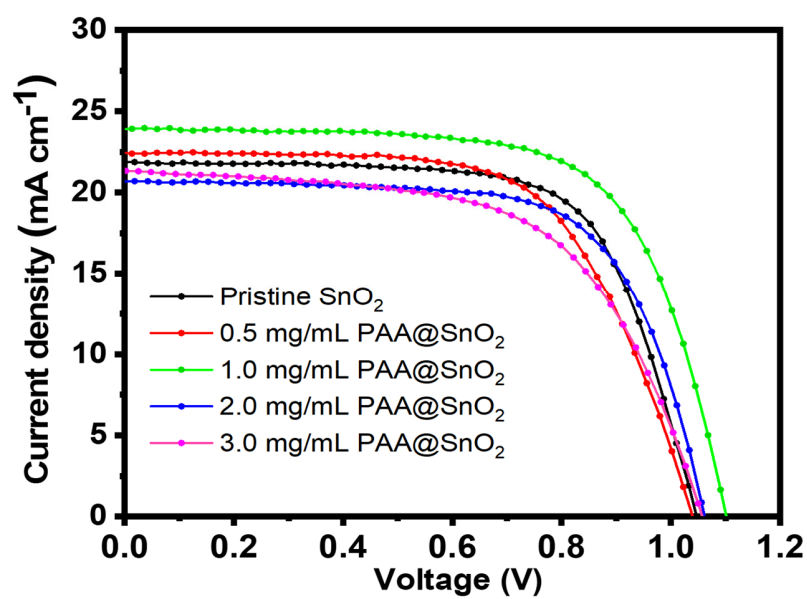

Fig. S11. J–V curves of the PSCs with different ETL substrates.

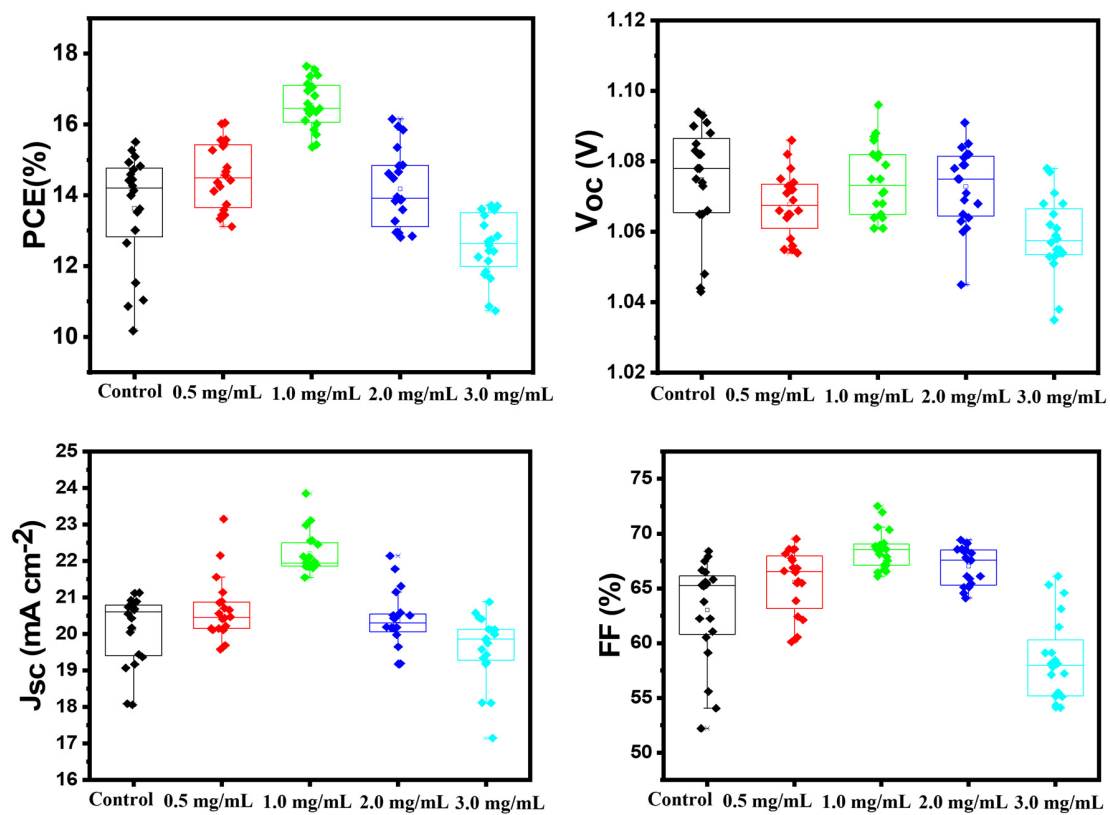

Fig. S12. Effects of varying PAA concentration on the photovoltaic parameters, including (a) PCE, (b) V_{oc} , (c) J_{sc} , and (d) FF.

Table S1. Device performance of perovskite solar cells with SnO₂ or PAA@SnO₂

Devices	PCE (%)	J _{sc} (mA cm ⁻²)	V _{oc} (V)	FF (%)
Pristine SnO ₂	15.507	21.86	1.05	63.2
0.5 mg/mL PAA	16.046	23.15	1.08	69.5
1.0 mg/mL PAA	17.145	23.85	1.08	72.5
2.0 mg/mL PAA	16.136	22.15	1.05	71.2
3.0 mg/mL PAA	13.821	19.82	1.01	62.2

Table S2. The parameters of 20 devices on pristine SnO₂ and PAA@SnO₂ ETLs.

SnO ₂	PCE (%)	V _{oc} (V)	J _{sc} (mA cm ⁻²)	FF
1	14.441	1.074	20.69	0.679
2	11.039	1.073	21.12	0.684
3	12.652	1.082	20.92	0.675
4	11.528	1.065	20.17	0.665
5	13.526	1.078	20.78	0.652
6	14.13	1.082	20.81	0.655
7	13.995	1.085	20.74	0.667
8	13.615	1.078	20.43	0.656

9	10.864	1.075	20.55	0.653
10	13.012	1.066	21.13	0.658
11	14.421	1.043	20.73	0.654
12	14.928	1.048	20.89	0.622
13	14.721	1.065	20.66	0.591
14	14.819	1.091	19.44	0.611
