Keywords: Carbon nanotube sheets, Elastomer, Chemo-mechanical energy harvesters, Wrinkled structure, Biaxial, Flexible

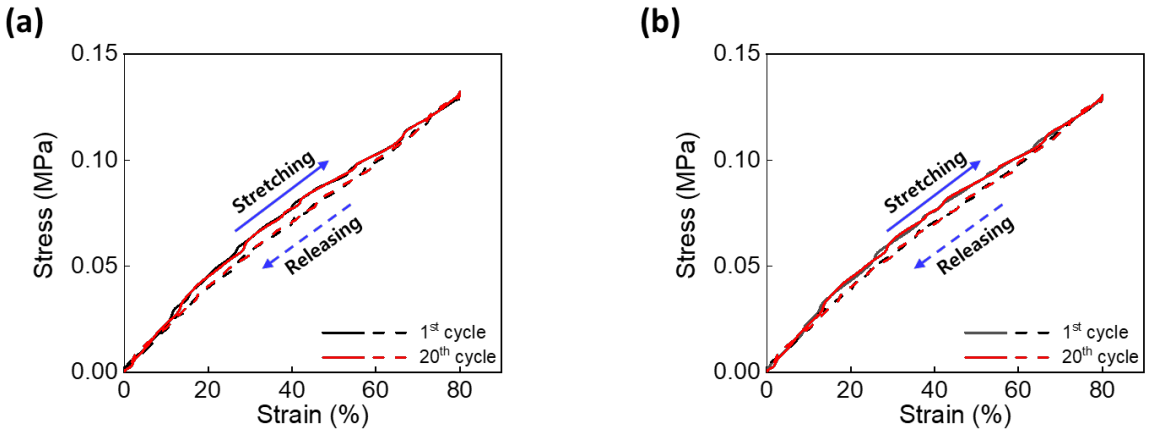

Figure S1. Strain–stress curves when stretching CBHE along the **(a)** x-axis and **(b)** y-axis during 20 cycles at a rate of 2 mm s^{-1}. The black and red show the 1st and 20th cycles, respectively. The solid and dashed lines show the stretching and releasing, respectively.
