Supplementary Figures:

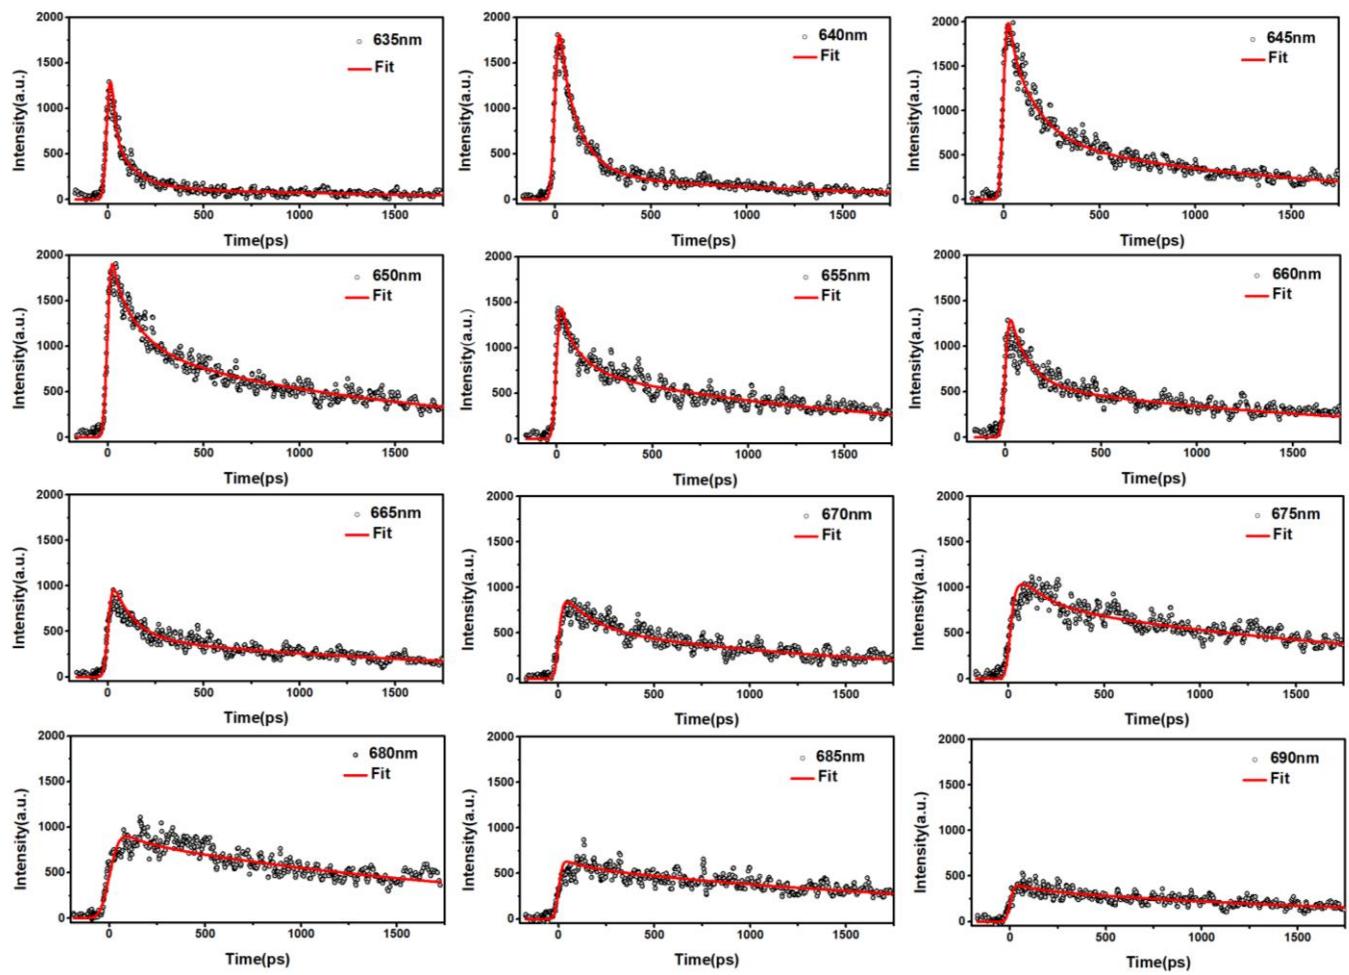

Figure S1. Fluorescence intensity decay curves and fitting results of PBS from T. 2134 at 77K on excitation at 498 nm. The detection wavelengths were 635nm, 640nm, 645nm, 650nm, 655nm, 660nm, 665nm, 670nm, 675nm, 680nm, 685nm, and 690nm. The experiment data is represented by black circles, and the fitting results are represented by red lines.

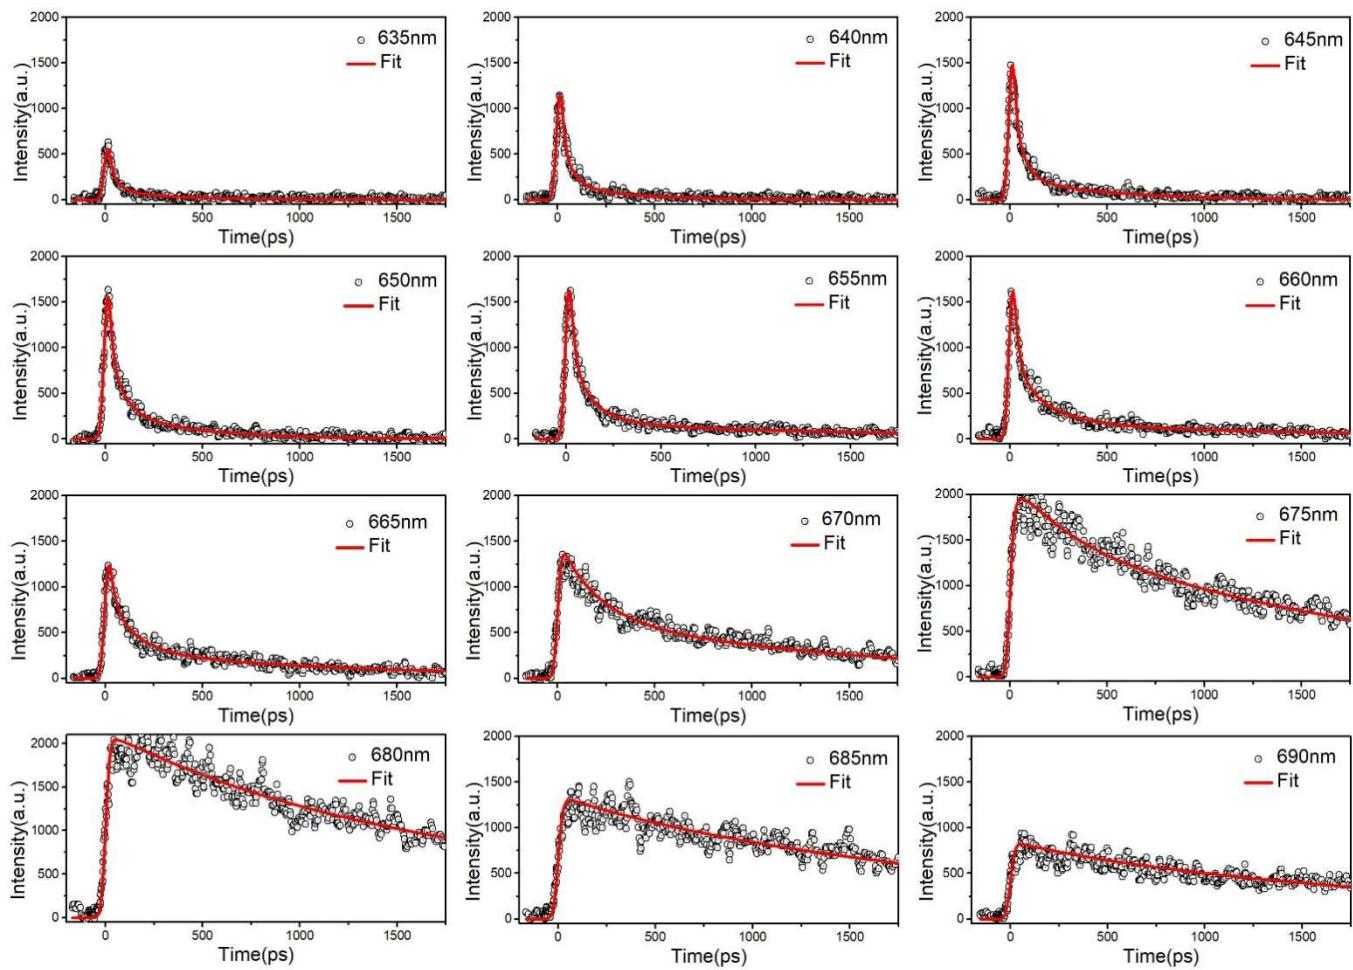

Figure S2. Fluorescence intensity decay curves and fitting results of PBS from T. 2134 at 77K on excitation at 570 nm. The detection wavelengths were 635nm, 640nm, 645nm, 650nm, 655nm, 660nm, 665nm, 670nm, 675nm, 680nm, 685nm, and 690nm. The experiment data is represented by black circles, and the fitting results are represented by red lines.

Supplementary Tables:

Table S1. The deconvolution results of T. 2134 on excitation at 498nm.

| E _{em/nm} | τ _{1/ps} | A _{1/%} | τ _{2/ps} | A _{2/%} | τ _{3/ps} | A _{3/%} | τ _{4/ps} | A _{4/%} | χ ² |
