

Table S1. Research question PICOT.

In a partially edentulous population (P) the realization of adhesive partial fixed prosthesis (I), compared to conventional partial fixed prosthesis (C), have superior clinical results (O) in a minimum follow-up of 5 years (T)?	
<i>Population (P)</i>	Partially edentulous population
<i>Intervention (I)</i>	adhesive partial fixed prosthesis
<i>Comparison (C)</i>	conventional partial fixed prosthesis
<i>Outcomes (O)</i>	clinical results
<i>Time (T)</i>	minimum follow-up of 5 years
