

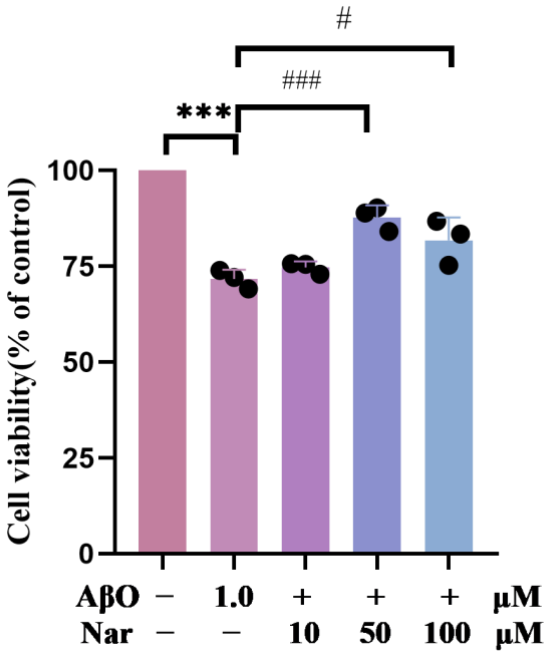

Figure S1. Cellular viability of AβOs and Nar on HT22 cells. Significance differences are indicated using "*" for the HT22 vs. HT22 + AβO groups and "#" for the HT22 + AβO vs. HT22 + AβO + Nar groups. $^{\#}p < 0.05$, $^{***/\#\#\#}p < 0.001$. Three parallel experiments were performed as replications (n=3).
