Manuscript ID: sensors-3529895
Title: Validation of Smartphones in Arbitrary Positions Against Force Plate Standard For Balance Assessment
Authors: German Jack Ellsworth, Stephen M. Klisch, Britta Berg-Johansen, and Eric Ocegueda

Author's Final Proofreading

Here we provide a list of modifications we made with changes marked in red in the manuscript. Additionally, the * refers to items that addressed highlighted comments from the production team.

1. ORCID added for authors.
2.* Paragraph 3 of Introduction: we removed the italics from "posturography".
3. Paragraph 4 of Introduction: corrected wrong tense "were" → "was". Improved clarity by adding author's name to statement.
4. Paragraph 5 of Introduction: minor changes to wording.
5.* Paragraph 1 of Section 2.1: added city to devices listed.
6.* Table 1 caption: added Supplementary Figure numbers.
7. Paragraph 2 of Section 2.1: clarified wording at the start of paragraph ("had a duration of" → "lasted") and replaced "s" with "seconds".
8.* Section 2.2: Added company cities and version number for MATLAB Mobile app.
9. Section 2.3.2: Added abbreviations ML and AP during first appearance in section.
10. End of Section 2.8: Added mention of computing root square mean error along with Spearman's rank correlation.
11. Section 3: Fixed typo "participating" → "participant" and added Supplementary Figure numbers.
12. Figures 4–9: Replaced hyphen with minus sign in all occurrences.
13.* Section 4.4.1: Removed italics for "small".
14. Section 4.4.2: Added clarification that filtering was only applied to smartphone data.
15.* Section 4.5: Added version and company location.
16. Section 5: Added statement to address the Academic Editor's comment.
17.* Reference 33: added date reference was accessed.
18.* Figure captions added to Supplementary Materials Section.
19.* Institutional Review: we mentioned that review was waived from our institution since the participants were the researchers.
20. Throughout manuscript: for consistency added "–" between medio–lateral and antero-posterior at all occurances.
