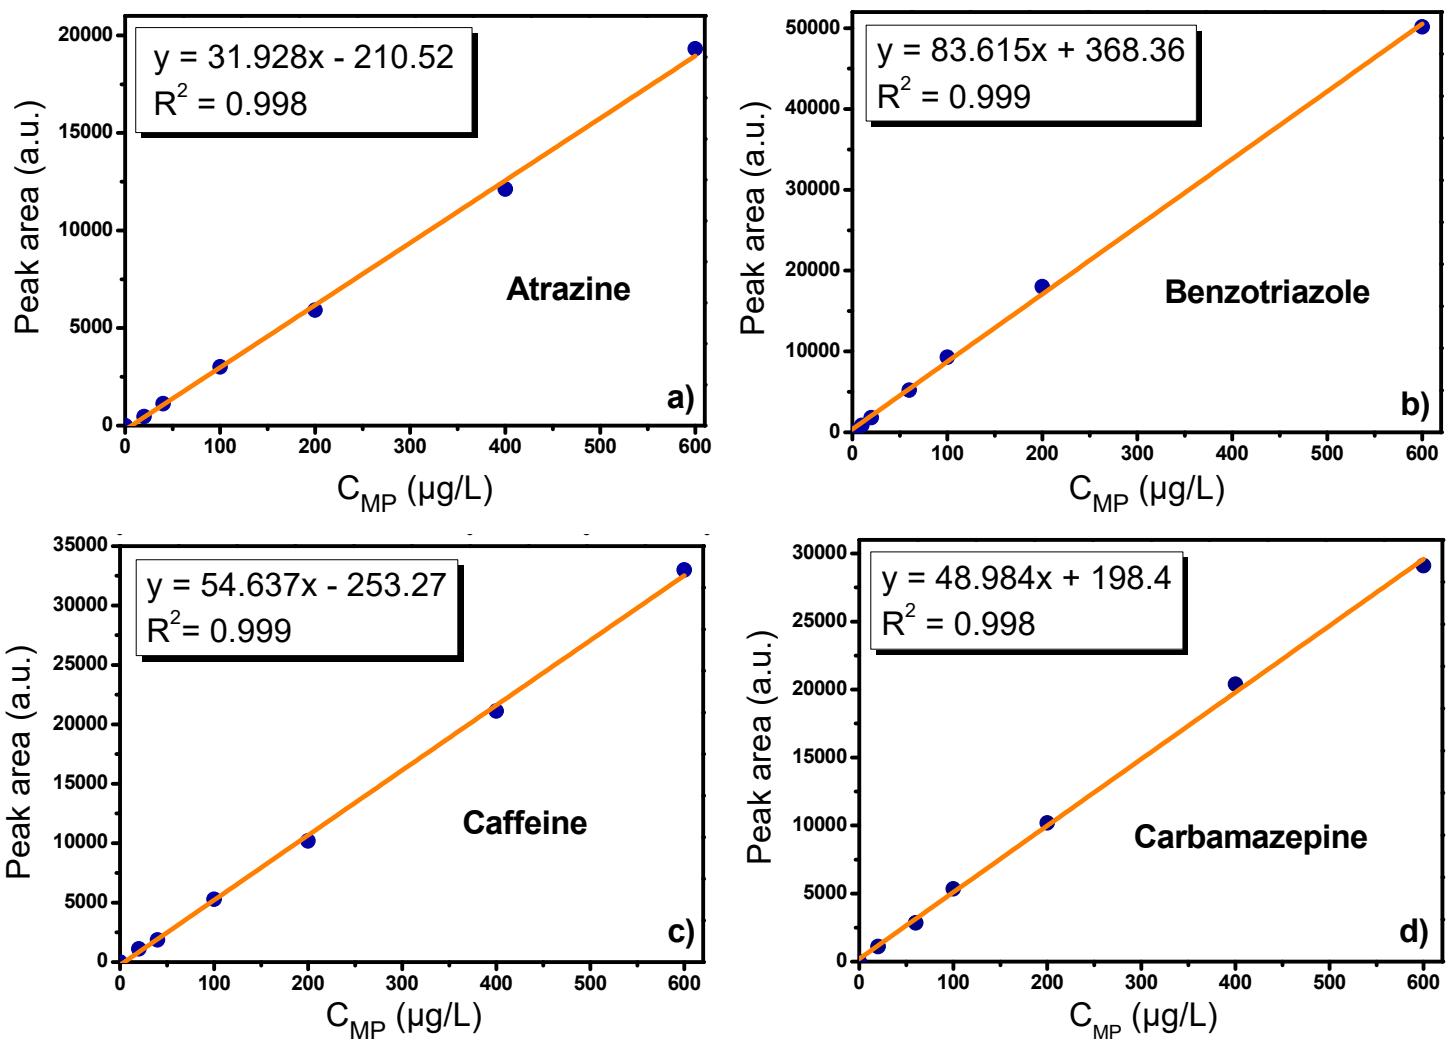

Figure S1. Linear calibration curve for the determination of (a) atrazine, (b) benzotriazole, (c) caffeine, (d) carbamazepine, (e) fluoxetine, (f) ibuprofen, (g) paracetamol and (h) p-CBA in the concentration range of 0-600 $\mu\text{g/L}$.

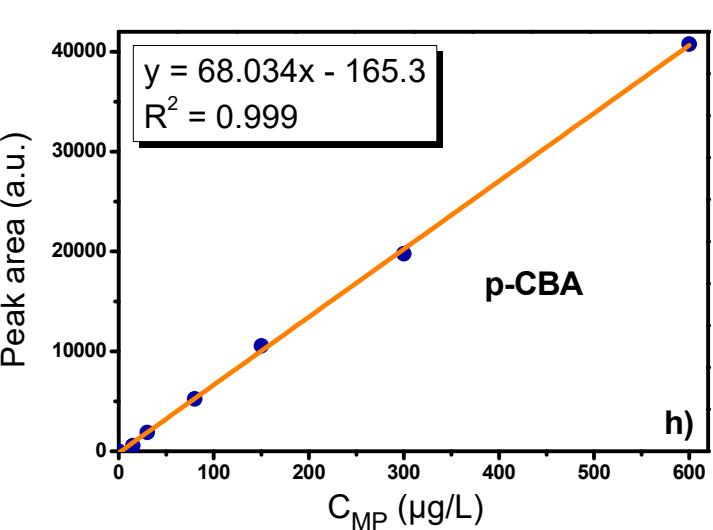

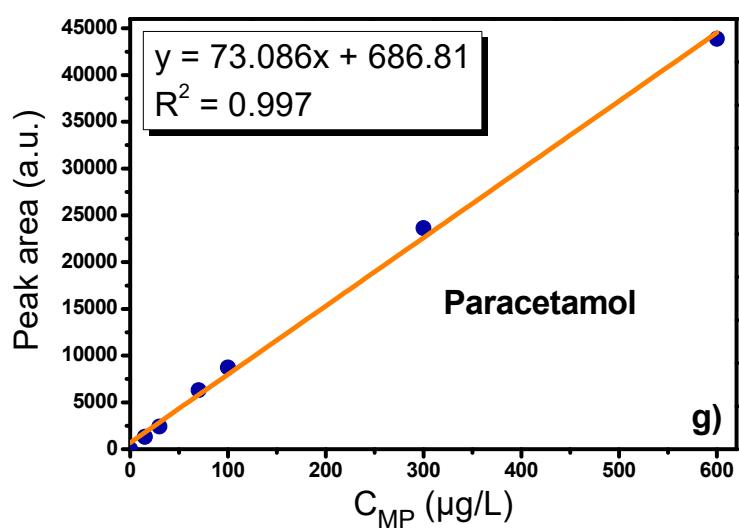

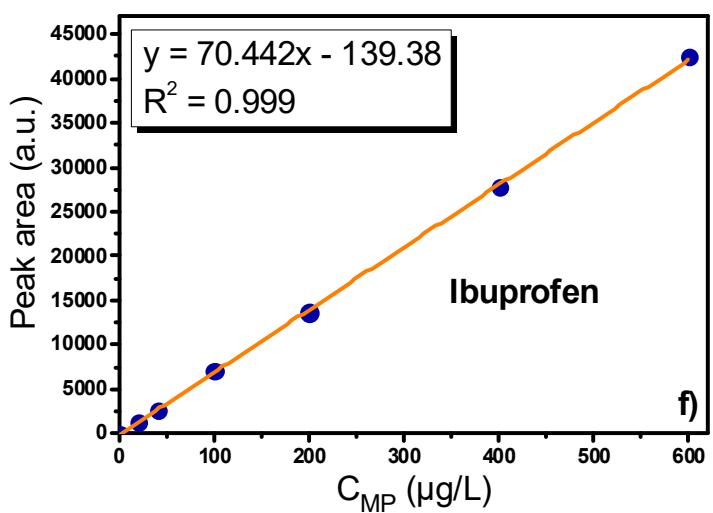

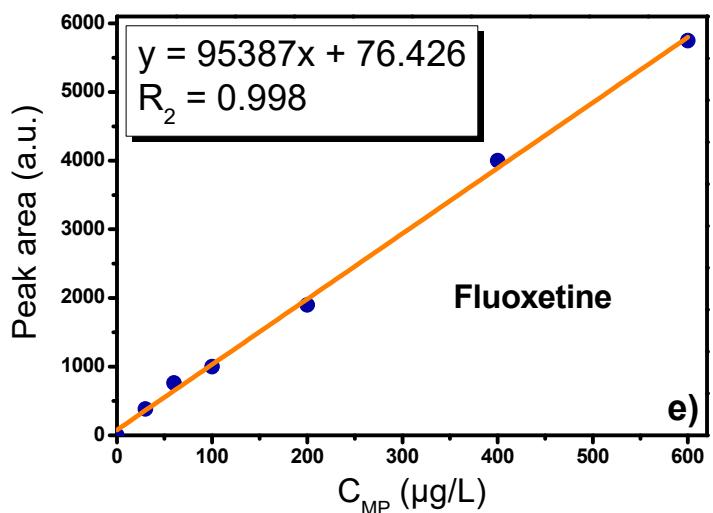

Figure S1 (continuous).

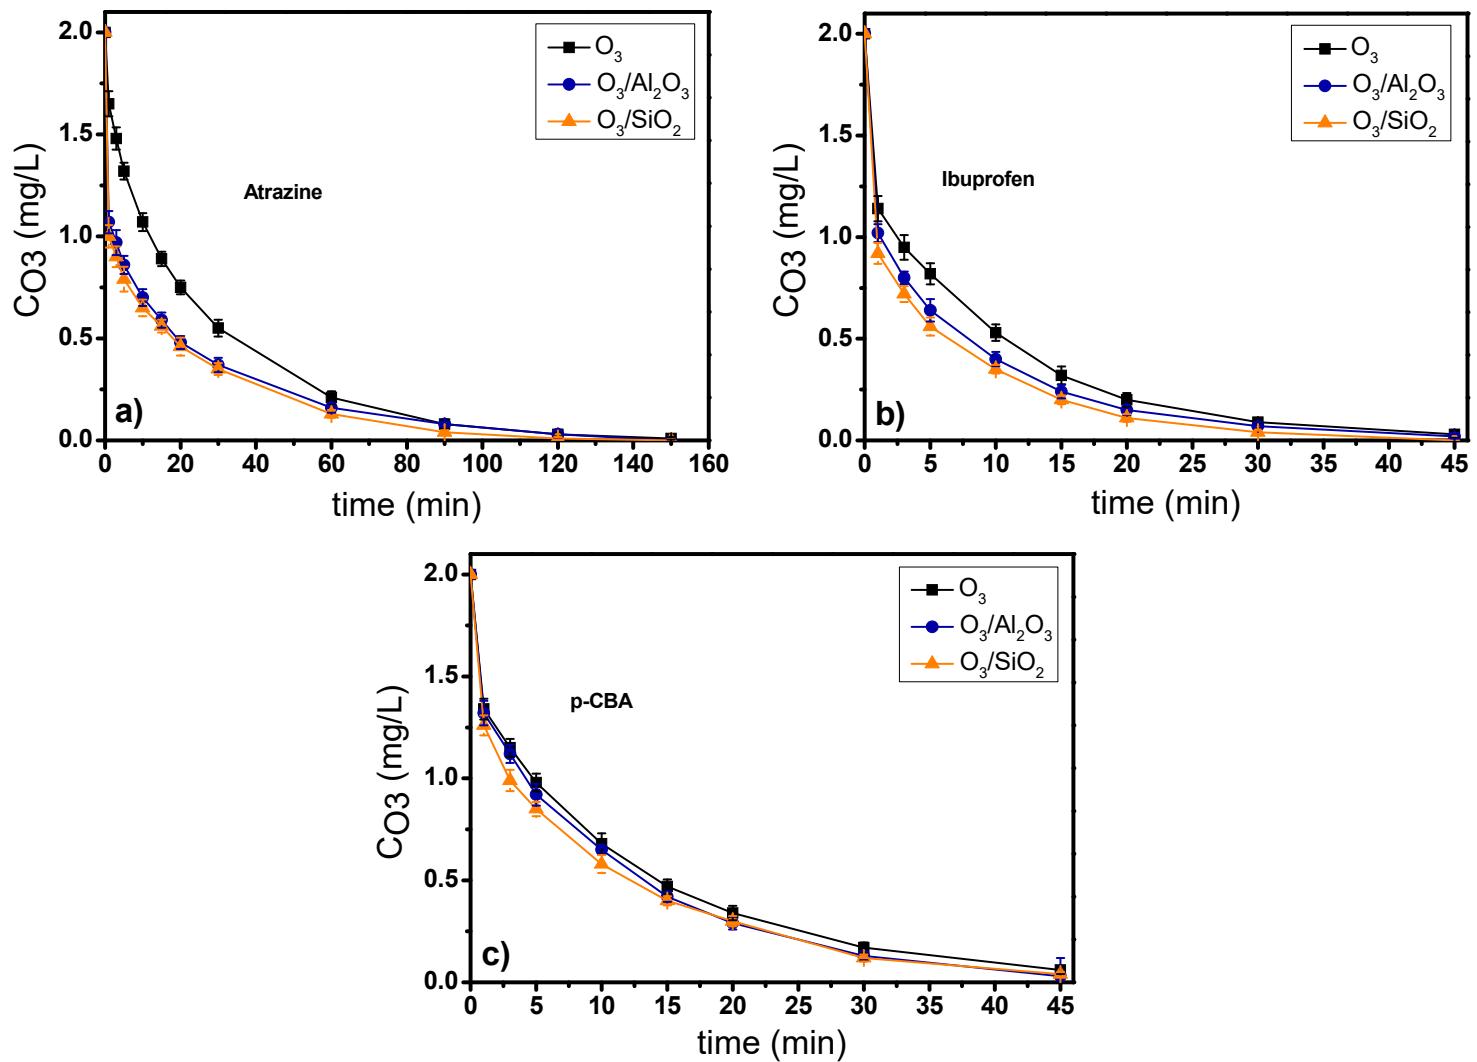

Figure S2. Ozone decomposition during catalytic ozonation of (a) atrazine, (b) ibuprofen and (c) p-CBA with the use of Al₂O₃ and SiO₂ as catalysts compared to single ozonation in natural potable water. Experimental conditions: C_{MP} 500 µg/L, C_{cat.} 0.5 g/L, C_{O₃} 2 mg/L, pH 7.8, T 23±2°C.

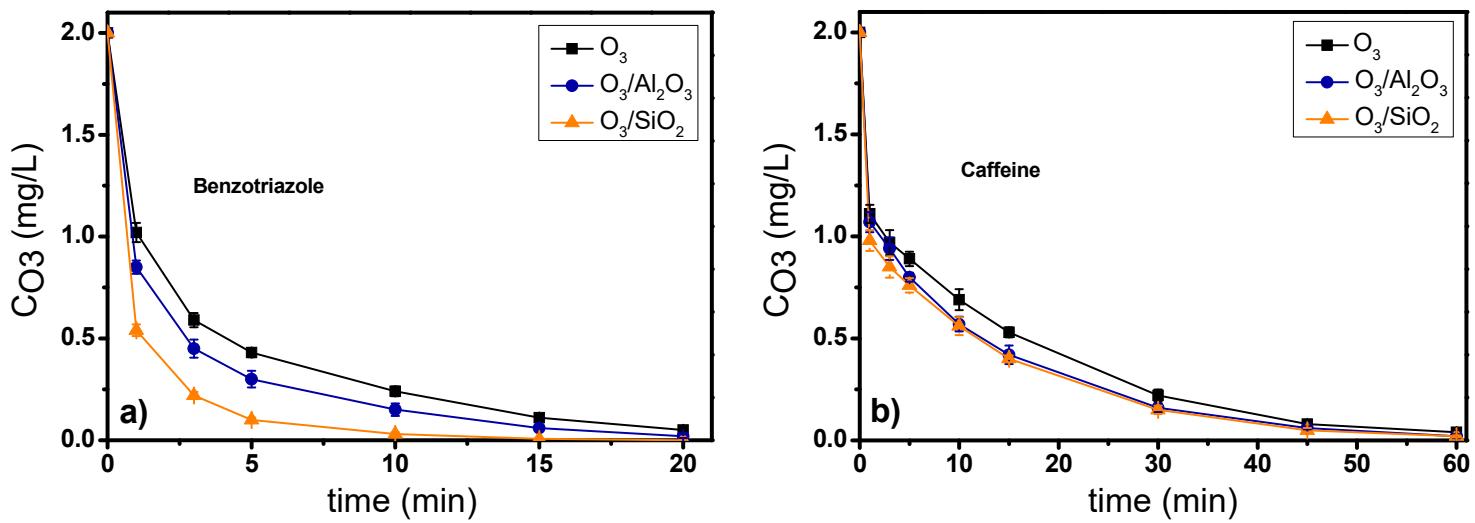

Figure S3. Ozone decomposition during catalytic ozonation of (a) benzotriazole, and (b) caffeine with the use of Al_2O_3 and SiO_2 as catalysts compared to single ozonation in natural potable water. Experimental conditions: C_{MP} . 500 μ g/L, C_{cat} . 0.5 g/L, C_{O_3} 2 mg/L, pH 7.8, T $23\pm2^\circ$ C.

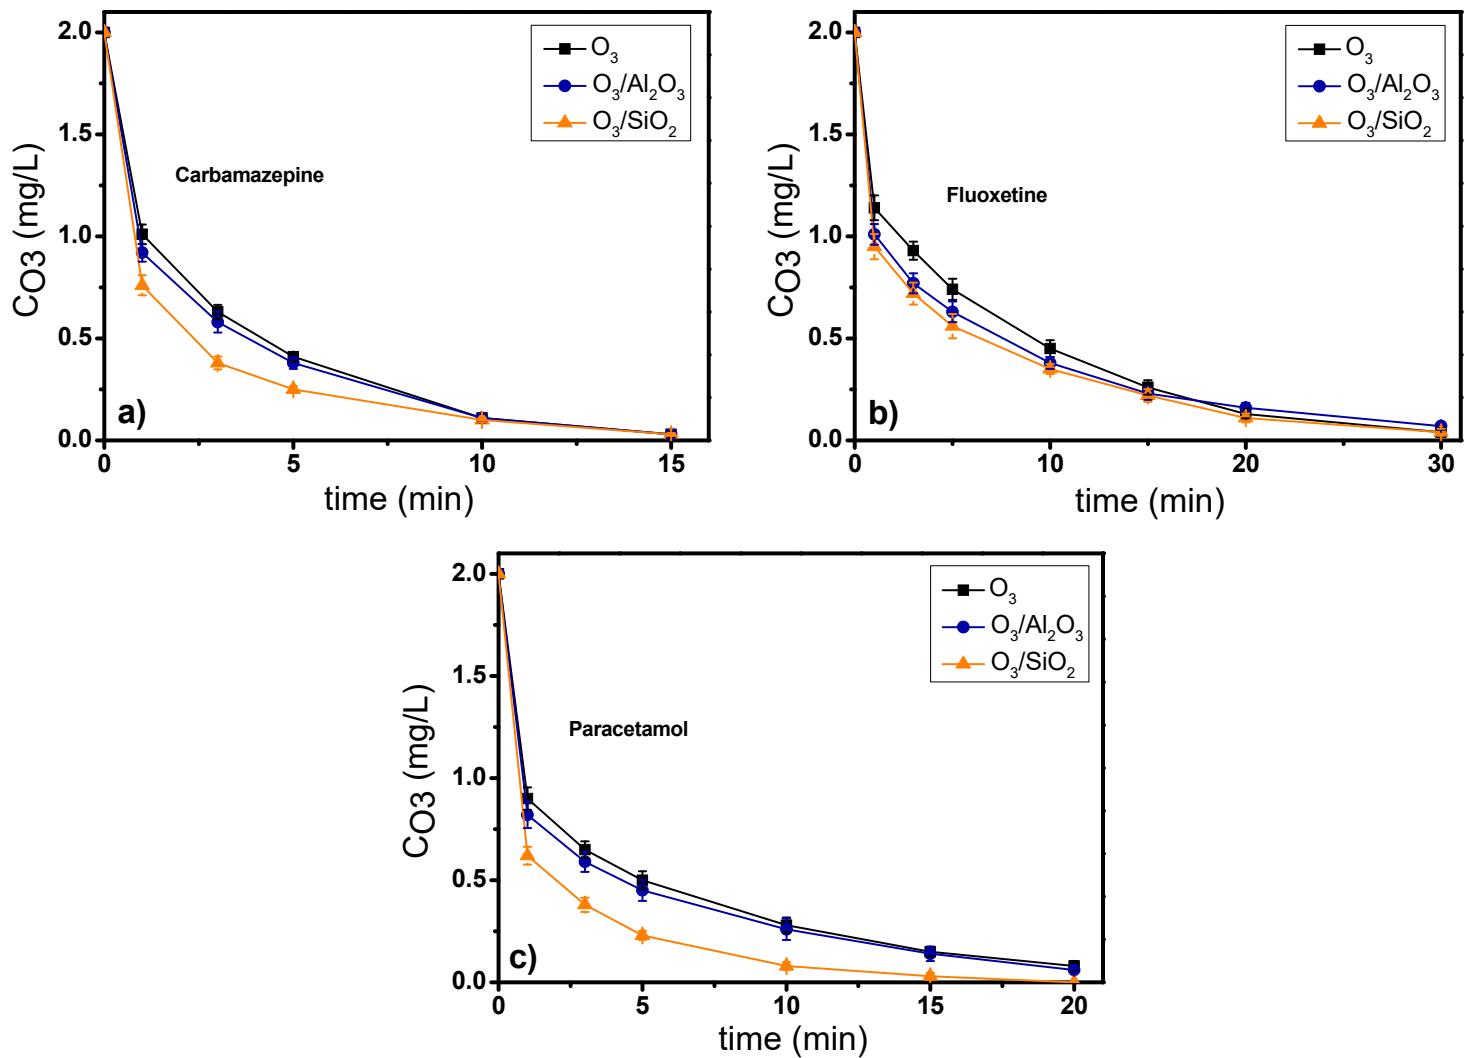

Figure S4. Ozone decomposition during catalytic ozonation of (a) carbamazepine, (b) fluoxetine and (c) paracetamol with the use of Al_2O_3 and SiO_2 as catalysts compared to single ozonation in natural potable water. Experimental conditions: C_{MP} 500 μ g/L, C_{cat} . 0.5 g/L, C_{O_3} 2 mg/L, pH 7.8, T $23\pm2^\circ C$.

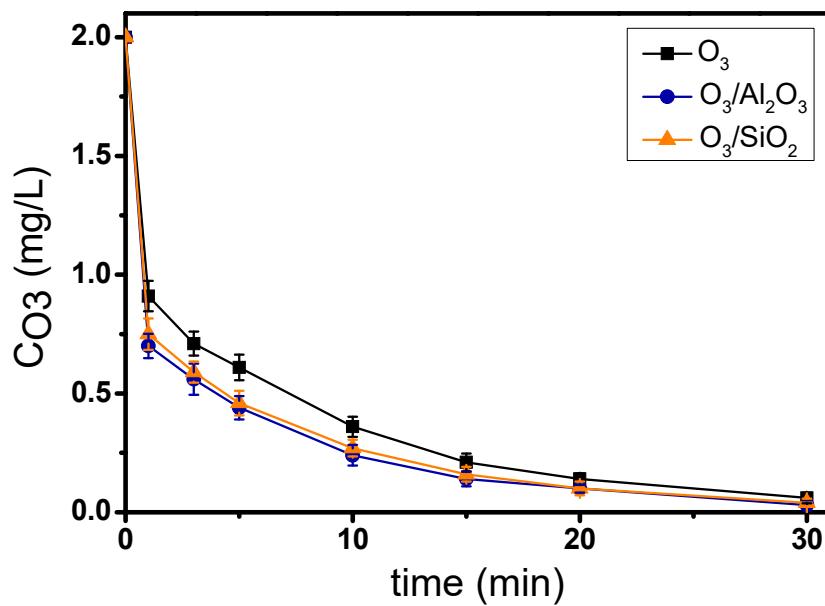

Figure S5. Ozone decomposition during catalytic ozonation of the mixture of the 8 examined micropollutants with the use of Al_2O_3 and SiO_2 as catalysts compared to single ozonation in natural potable water. Experimental conditions: C_{MP} . 50 $\mu\text{g}/\text{L}$, C_{cat} . 0.5 g/L, Co_3 2 mg/L, pH 7.8, T $23 \pm 2^\circ \text{C}$.

Table S1. HPLC measurement parameters for the determination of the concentration of the examined 8 micropollutants.

Micropollutant	% Solvent ratio		Sample amount (μL)	Flow (mL/min)	Absorption (nm)
	<i>10 mM phosphoric acid</i>		<i>Acetonitrile</i>		
Atrazine	50	50	25	0.8	254
Benzotriazole	75	25	25	0.8	254
Ibuprofen	40	60	10	1.1	220
Carbamazepine	60	40	25	0.8	254
p-chlorobenzoic acid	60	40	25	0.8	254
Fluoxetine	62	38	50	1.0	214
	<i>Water</i>		<i>Methanol</i>		
Caffeine	75	25	20	1.0	275
Paracetamol	90	10	25	1.0	243

Table S2. 1st order reaction rate constants of ozone decomposition during catalytic ozonation with the use of SiO₂ and Al₂O₃ as catalysts for ozone concentration 2 mg/L in experiments with one probe compound.

Micropollutant	O ₃			O ₃ /SiO ₂			O ₃ /Al ₂ O ₃		
	k (min ⁻¹)	Equations	R ²	k (min ⁻¹)	Equations	R ²	k (min ⁻¹)	Equations	R ²
Atrazine	0.033	y = -0.033x - 0.252	0.999	0.037	y = -0.037x - 0.685	0.991	0.038	y = -0.038x - 0.753	0.996
Benzotriazole	0.150	y = -0.150x - 0.669	0.992	0.308	y = -0.308x - 1.208	0.991	0.186	y = -0.186x - 0.819	0.990
