

**Table S1.** Estimated richness of food resources produced by farmers of Jardín in a) coffee-banana plantations, b) gardens, and c) grazing lands. We depict the number of sampling units (sample size), the method (interpolated, observed, or extrapolated), the diversity order, the diversity estimate of order q ( $qD$ ), the 95% (default) lower and upper confidence limits of diversity ( $qD.LCL$ ,  $qD.UCL$ ), and the sample coverage estimate (SC) along with the 95% (default) lower and upper confidence limits of sample coverage (SC.LCL, SC.UCL).
