VC10	5. A. Rural farming is central to our survival as a community.		0.4							0.2	0.2	0.2	
VC10	B. We value farming but we require the necessary farm inputs.	0.4								0.2	0.2	0.2	
VC10	C. Mechanized farming is the future [For self sufficiency and food security].	0.4								0.2	0.2	0.2	
VC10	7. A. We value erosion control work through volunteer		0.5									0.25	0.25

	activities. [always been the basis for our survival here as a community for thousands of years because erosion is a central issue here]				
VC10	B. We value help from the rich towards uplifting the poor. [most of the erosion works we do here, we do by community effort because but yet, historically, right from the beginning of time,	0.25		0.25	0.5

	our people are good at the rich bringing out their resources to help the community. So that's why we say that we value erosion control through volunteer activities]			
VC10	8. It is important that we solve challenges in unity. [...That is why we have this CBO (community based organization) and we elect our leaders every 4 years	0.5		0.5

	so as to bind the community together in unity to solve common problems (like erosion control)]	
VC11	8. It is of utmost importance to us to keep and maintain our environment.	1
