

Prompt used for Study 2

The uploaded dataset contains all textual content extracted from sustainability reports published by resorts operating in the Maldives. Please analyze the dataset and:

1. Identify all distinct themes that emerge from the transcripts.
2. Provide unedited quotes to support each theme.
3. Generate short definitions for the results table.
4. Count the number of sentences associated with each identified theme.
5. For each theme, provide a representative set of unedited quotes from the text to support each theme. Generate short definitions for the results table.

Prompt Used for Study 3

Please extract the contents of the uploaded image archive and proceed with the following tasks:

1. Identify the main visual themes represented in each image.
2. Do not use any metadata or file names in the analysis.
3. Clearly report the total number of images analyzed and describe the method used to analyze them.
4. Conduct a qualitative synthesis of the themes that emerged across all images.
5. For each identified theme, provide a concise description to support each theme and a summary of the key insights it conveys within the dataset
