Figure 1. This figure represents all the mutations from nt(2206-2256) in NS1VP1u junction. There was common nucleotide change in samples 233, 726, 795, 1036 and 772 at positions 2268G>C, samples 233,726 at position 2289C>T and samples 233,726, 772 at position 2244A>G, samples 795, 1036,772 at positions 2215G>A and samples 3038,3045 at position 2235T>C. There was a single nucleotide change in sample 772 at position 2231T>C, whereas sample 1970 have multiple mutation at different position 2217T>A, 2219A>G, 2223G>T, 2233G>T), 2243A>C, 2233 T>G, 2223T>G , 2042C>A. All other bases in these regions were identical. Nucleotide reading frame assignments are according to previous published papers (52, 59).

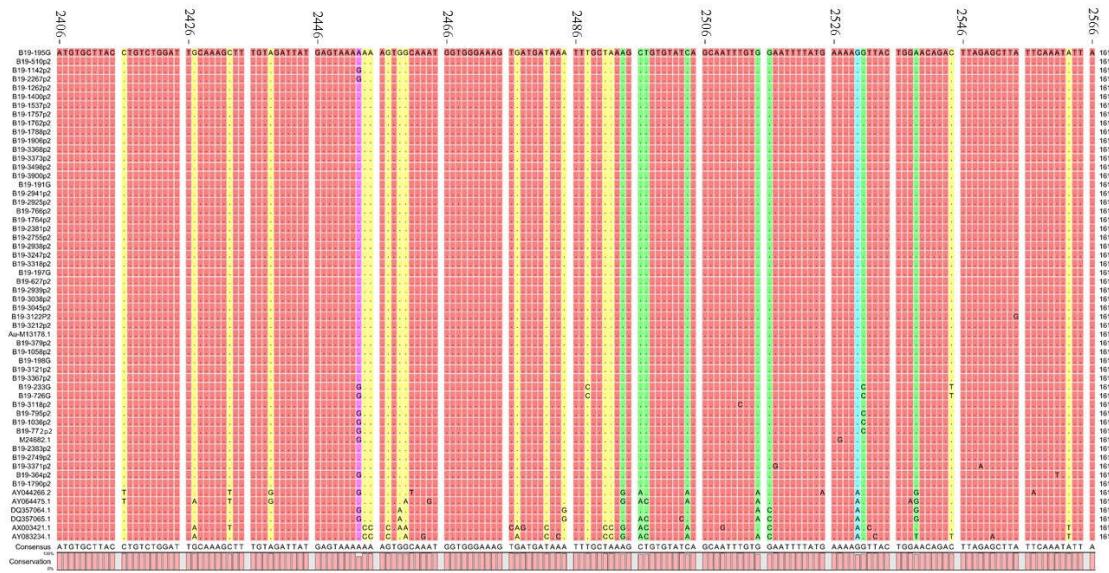

Figure 2. This figure is representing all the mutations from nt (2406–2566) in NS1VPu junction. Sample 3212 at position 2404 A > G, samples 726, 364, 772, 795, 1036, 1142, 2267 and 233 at position 2453 A > G, samples 726, 772, 795, 1036 and 233 at position 2531 G > C, samples 726 ad 233 at position 2544 C > T, sample 3371 at position 2548 G > A and sample 3122 at positions 2544 C > A, 2555 A > G, 2561 A > T.
