

Supplemental Figures and Table

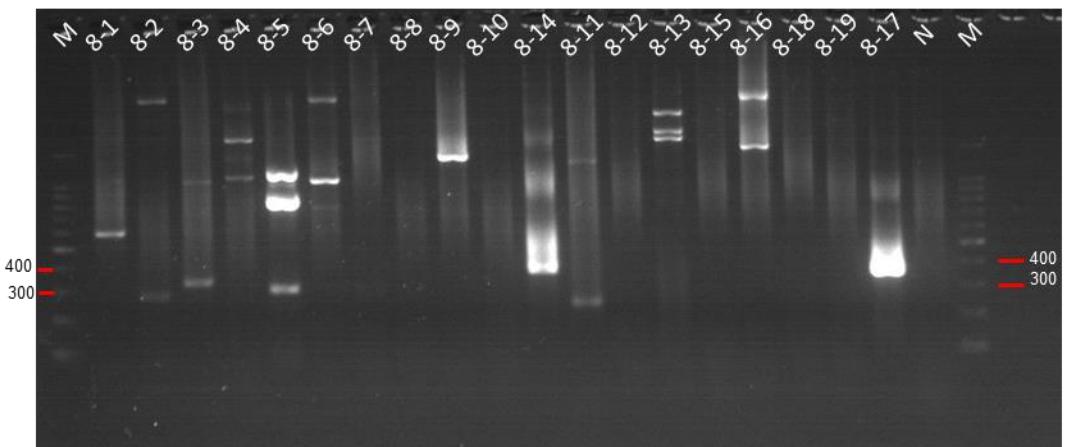

Figure S1. Nested PCR for gG-qPCR-positive samples

Nineteen samples (No.8-1, through 8-19) have been initially detected to be positive by gG-qPCR and further confirmed by nested PCR. The amplicon is 359 bp long. No. 8-1 through 8-19 have been loaded. M; 100 bp DNA ladder. Target bands are identified in No.8-14 and 8-17.

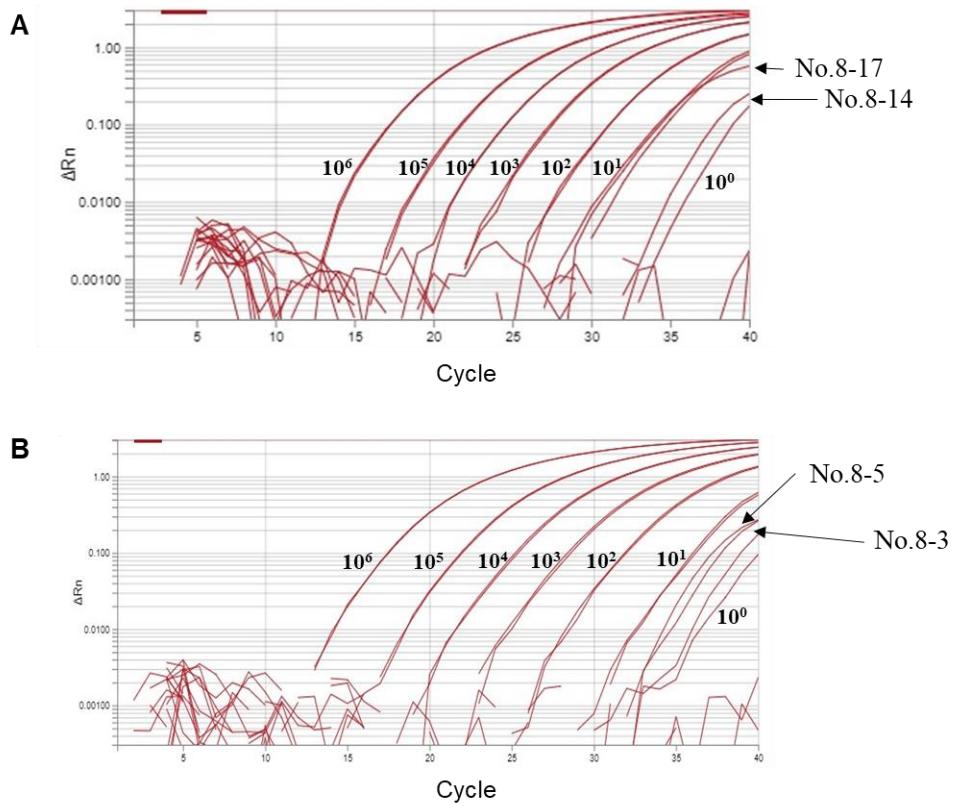

Figure S2. qPCR-gG amplification curve of No. 8-14 and No. 8-17 (A), and No. 8-3 and No. 8-5 (B).

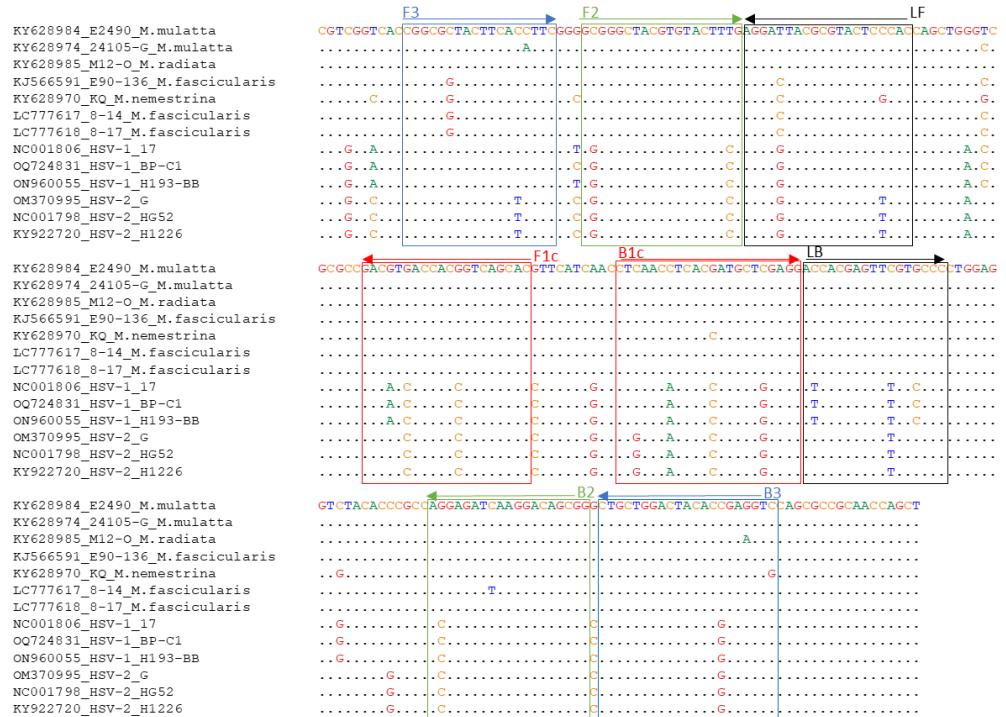

Figure S3. Sequence alignments of LAMP primer target regions of the genomes of BV and human herpesviruses (HSV-1 and HSV-2). The accession number of the genome sequence of the viruses are shown on the left.

Table S1. Sequences of the primers for conventional PCR and sequencing

Primer set	Primer	Sequence (5'-3')
UL27-LAMP_1st	UL27-LAMP_Seq_F1	ACGTCATCATGCAGAACTCG
	UL27-LAMP_Seq_R1	GGTTGGAGAGGAAGGAGGAC
UL27-LAMP_nested	UL27-LAMP_Seq_F1	ACGTCATCATGCAGAACTCG
	UL27-LAMP_Seq_R2	GGCCCTCGAAGAAGGAGTAG
