# Supplementary Figures

**Supplementary Figure S1**

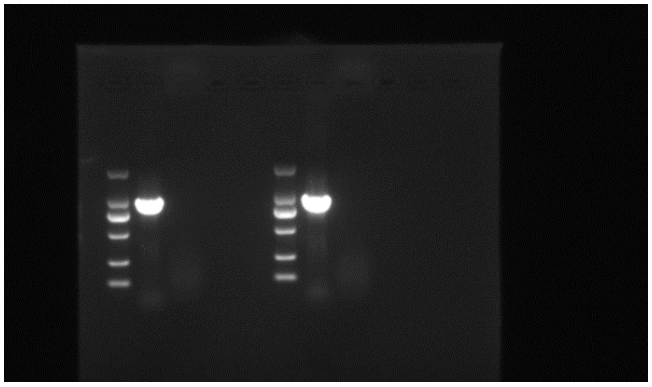

**Figure S1. Full electrophoresis image corresponding to Figure 1A.** Original scanned image showing detection of the *CAP* gene in the supernatant of HEK293T cells by polymerase chain reaction, visualized using 1% agarose gel electrophoresis.

**Supplementary Figure S2**

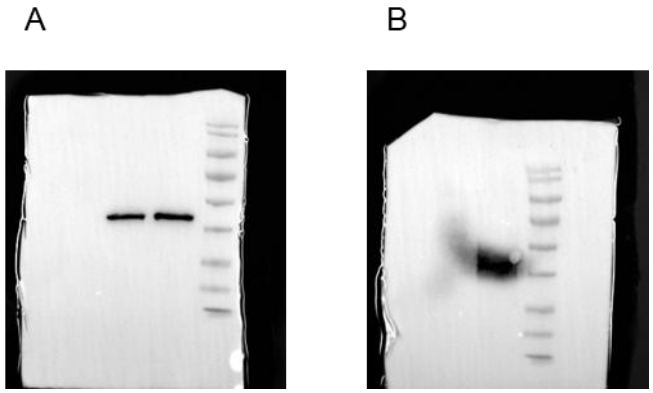

**Figure S2. Full blots images corresponding to Figure 1C.** Original scanned western blot images showing the expression of Cap protein (A) and β-actin (B) in HEK293T cells during infection.

**Supplementary Figure S3**

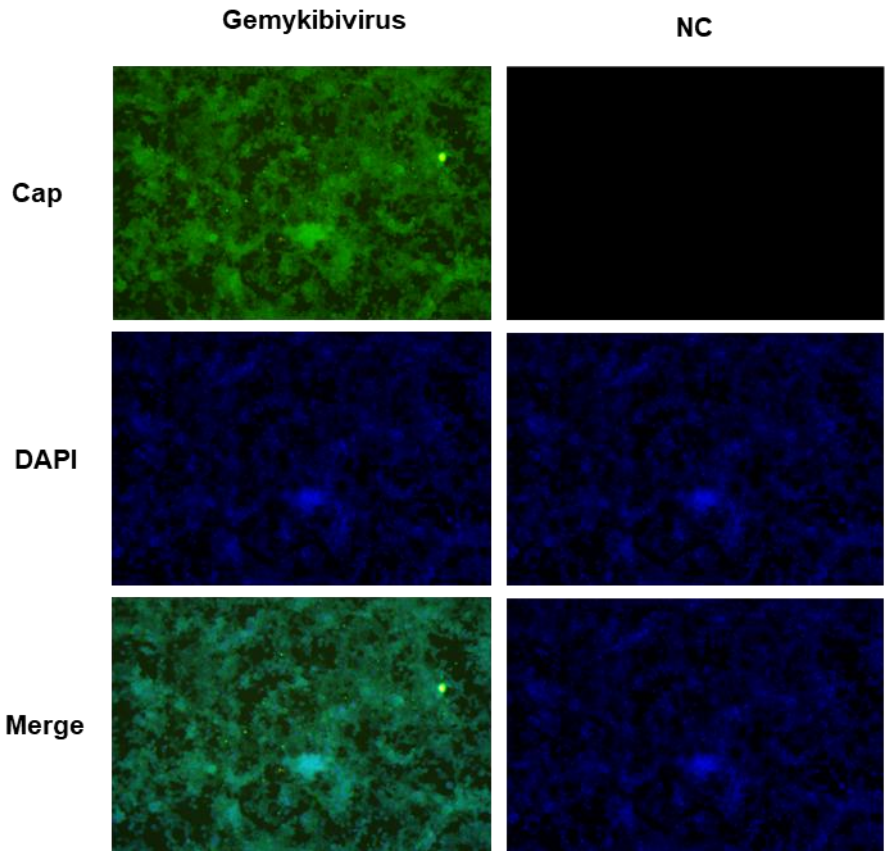

**Figure S3. Full confocal microscopy images to Figure 1B.**

**Supplementary Figure S4**

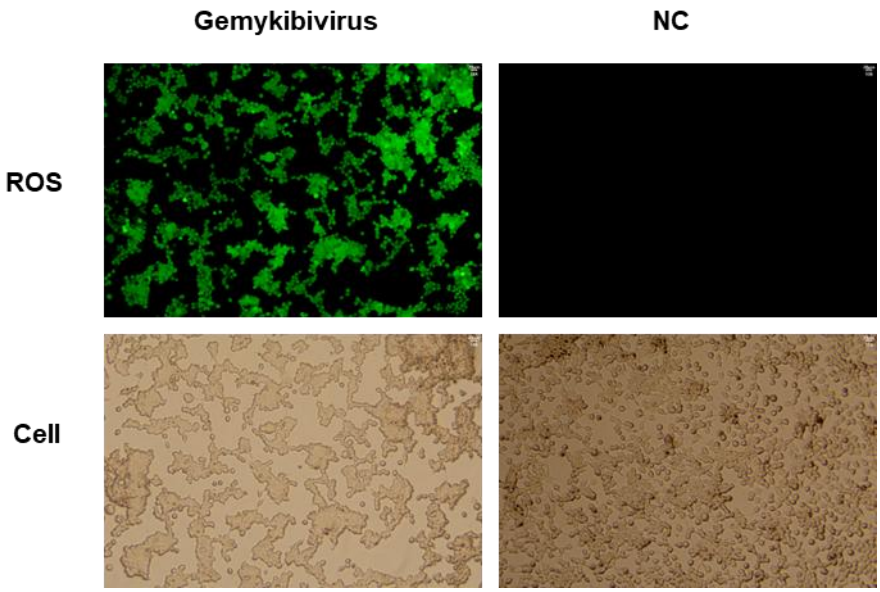

**Figure S4. Full confocal microscopy images to Figure 5D.**
