Table S3: Extraction table

(i) Overview of study characteristics and sample collection

Study characteristics							Sample collection		
Paper no.	Year	country	Sampling site	Population served	Sample type	Sampling Approach	Sampling frequency	Sampling duration	Storage conditions

(ii) Laboratory and analytical analysis

Paper no.	Concentration method and initial volume for concentration	Detection method	Normalization performed	Process control	Sequencing performed	Dengue serotypes identified

(iii) Outcome and epidemiological links

Authors	Sample Positivity (%)	Prevalence in area	**outcome measure	Viral load / recovery efficiency	Correlation with epidemiological data	Aims of the study
