Table S2. Demographic, clinical, and virological characteristics of influenza-positive samples sequenced during the 2025–2026 surveillance period (n=19). For each sample, the region, sex, age, hospitalization and ICU status, sample origin (sentinel, non-sentinel, or SARI), GISAID EPI_ISL accession number, date of sampling, surveillance week, and RT-PCR cycle threshold (Ct) value are shown.

Sample	Region	Sex	Age	Hospitalized	ICU	Sample Origin	EPI_ISL Accession	Date of sampling	Surveillance week	Ct
