Supplementary Material

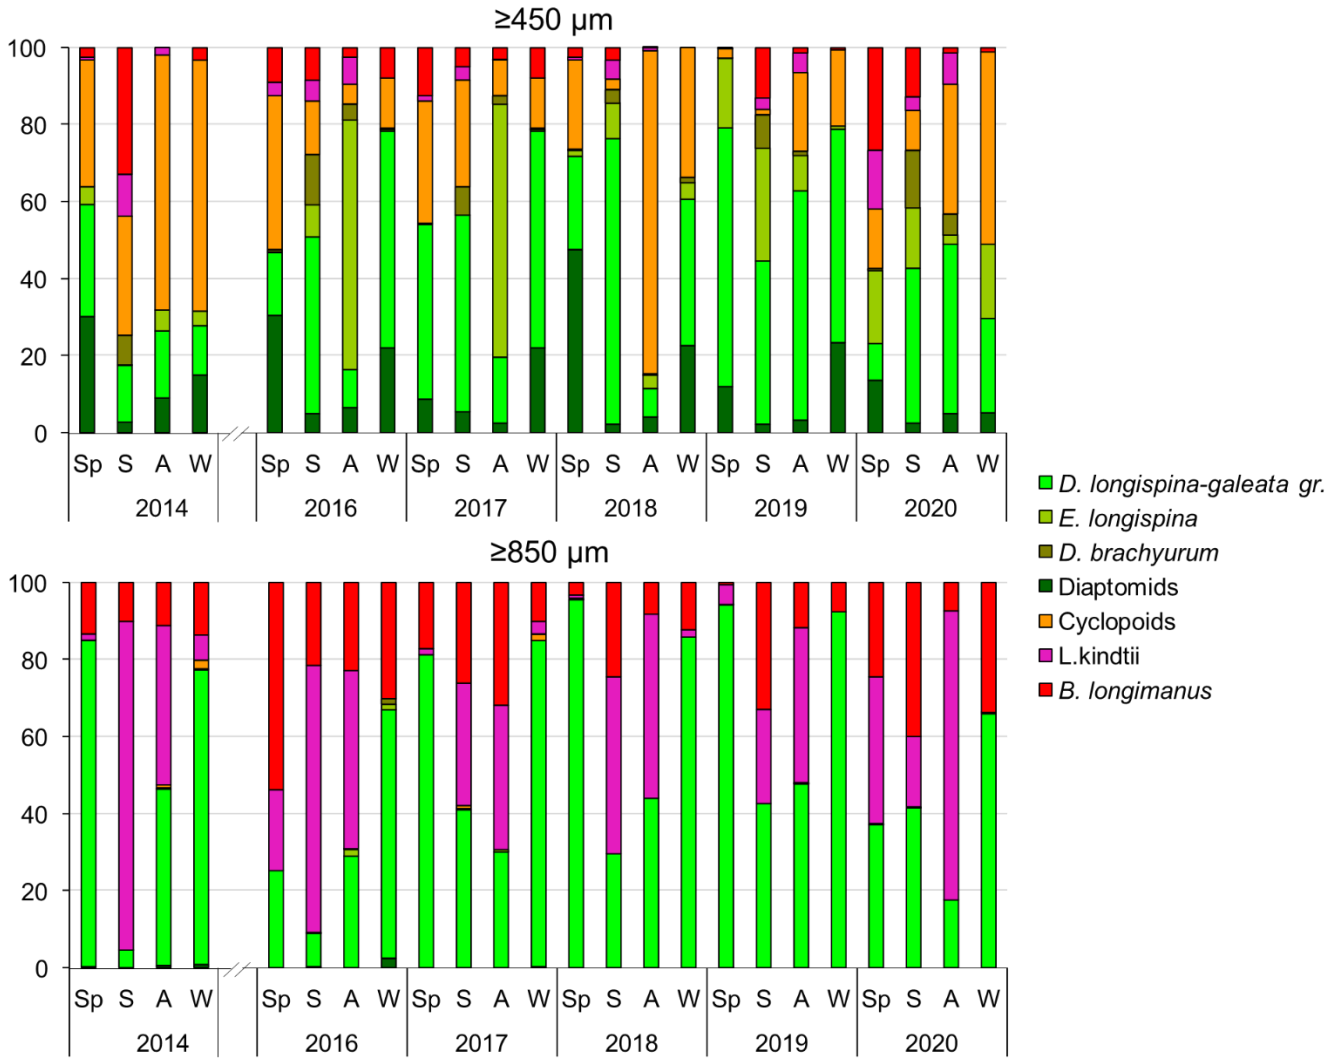

Figure S1. Relative contribution (%) of zooplankton taxa to total biomass for two size fractions (≥450 µm and ≥850 µm) collected seasonally (Sp = spring, S = summer, A = autumn, W = winter) in Lake Maggiore (Northern Italy) between 2014 and 2020.

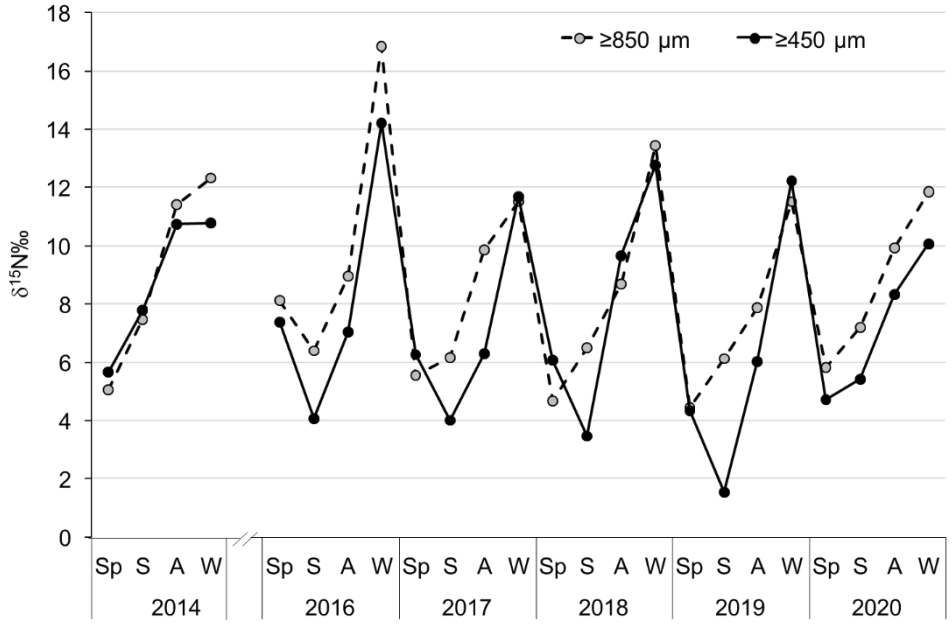

Figure S2. Nitrogen isotopic signatures for two size fractions (≥450 µm and ≥850 µm) of zooplankton collected seasonally (Sp = spring, S = summer, A = autumn, W = winter) in Lake Maggiore (Northern Italy) between 2014 and 2020.

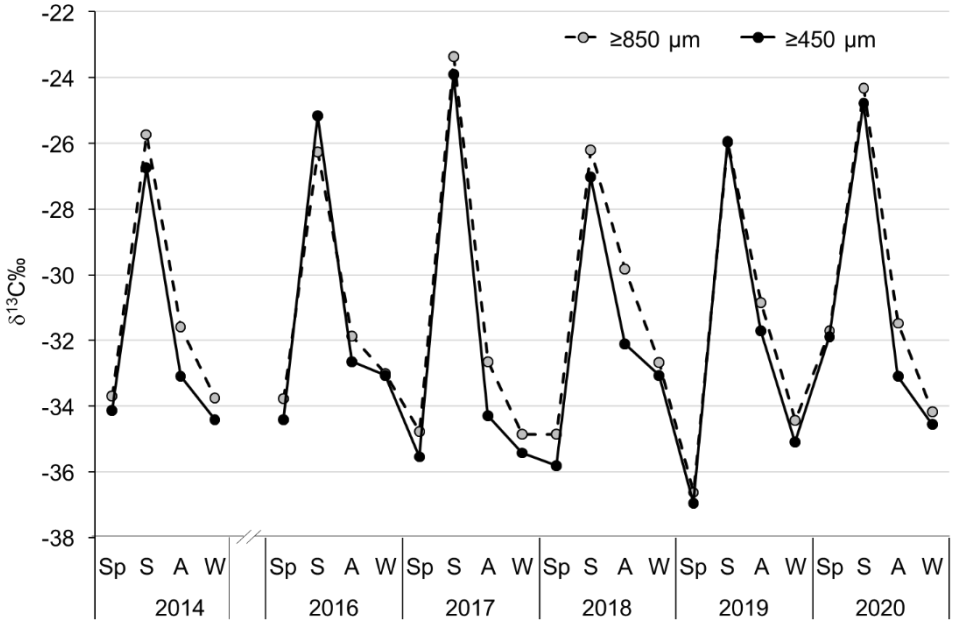

Figure S3. Carbon isotopic signatures for two size fractions (≥450 µm and ≥850 µm) of zooplankton collected seasonally (Sp = spring, S = summer, A = autumn, W = winter) in Lake Maggiore (Northern Italy) between 2014 and 2020.
