The role of many phytochemicals in the modulation of the carcinogenesis process has been well documented by combining in vitro and animal studies, as well as epidemiological evidence. When acting in synergy, phytochemicals exert potential anti-cancer properties and much progress has been made in defining their many biological activities at the molecular level. However, an interesting feature in the field of phytochemicals and cancer is the role of some phytochemicals in promoting cancer development. This Special Issue of *Toxins* aims to provide a comprehensive look at the contribution of dietary and non-dietary phytochemicals to cancer development and at the molecular mechanisms by which phytochemicals inhibit or promote cancer. These aspects are extremely useful for the definition of efficient preventive measures against cancer.

MDPI Books publishes high quality monographs (short or full-length), edited books, proceedings, doctoral theses and Special Issue books in open access. Authors pay a Book Processing Charge (BPC) and are asked to accept the Copyright Agreement. MDPI Books are published under Creative Commons licenses (CC BY-NC-ND). If you are an author and interested in publishing with us, please see the submission information and contact books@mdpi.com.

Open Access: Scholarly work is accessible worldwide without any restrictions: in comparison with traditional book printing, open access publications save costs, space and time.

High Quality: MDPI ensures a thorough peer-review for all published items.

Rapid Publication: MDPI offers a fast but precise editorial and publication procedure.

Print on Demand: Books are available for purchase at any time and reduction of costs by a modern print-on-demand procedure.

Different Formats: Authors benefit from our hybrid publishing service, which offers the possibility to not only receive a digital format, but also a printed version of your work.

**High Visibility;
Fast and Wide
Dissemination:** Global network (including the USA, Europe, and Australia) and well-known channel partners (e.g., Amazon); registration in the Directory of Open Access Books (DOAB).
