ISBN 978-3-03842-482-6 (print) • ISBN 978-3-03842-483-3 (electronic)

In 1692, Newton wrote: "That gravity should be innate, inherent and essential to matter so that one body may act upon another at a distance through a vacuum, without the mediation of anything else by and through which their action or force may be conveyed from one to another, is to me so great an absurdity that I believe no man who has in philosophical matters any competent faculty of thinking can ever fall into it. Gravity must be caused by an agent acting constantly according to certain laws, but whether this agent be material or immaterial is a question I have left to the consideration of my readers". One of them who, just over 200 years later, picked up the baton of Newton was Albert Einstein. His General Theory of Relativity, which had its centenary in 2015, opened up new windows on our comprehension of Nature, disclosed new, previously unpredictable, phenomena occurring when relative velocities dramatically change in intense gravitational fields reaching values close to the speed of light and, for the first time after millennia of speculations, put Cosmology on the firm grounds of empirically testable science. This Special Issue was dedicated to this grand achievement of the human thought.

MDPI | *books*

MDPI Books publishes high quality monographs (short or full-length), edited books, proceedings, doctoral theses and Special Issue books in open access. Authors pay a Book Processing Charge (BPC) and are asked to accept the Copyright Agreement. MDPI Books are published under Creative Commons licenses (CC BY-NC-ND). If you are an author and interested in publishing with us, please see the submission information and contact books@mdpi.com.

- Open Access:** Scholarly work is accessible worldwide without any restrictions: in comparison with traditional book printing, open access publications save costs, space and time.
- High Quality:** MDPI ensures a thorough peer-review for all published items.
- Rapid Publication:** MDPI offers a fast but precise editorial and publication procedure.
- Print on Demand:** Books are available for purchase at any time and reduction of costs by a modern print-on-demand procedure.
- Different Formats:** Authors benefit from our hybrid publishing service, which offers the possibility to not only receive a digital format, but also a printed version of your work.
- High Visibility;
Fast and Wide
Dissemination:** Global network (including the USA, Europe, and Australia) and well-known channel partners (e.g., Amazon); registration in the Directory of Open Access Books (DOAB).
