Hepatitis C virus (HCV) chronic infection can determine liver fibrosis, cirrhosis and hepatocellular carcinoma, as well as several extra-hepatic manifestations (i.e., mixed cryoglobulinemia, metabolic syndrome, kidney disease, etc.). HCV infection is asymptomatic until severe stages of disease, thus screening policy in the general population and in specific risk categories is necessary to allow for timely intervention. Despite a high sustained virological response by direct-acting antiviral drugs, a limited percentage of treated subject failed therapy according to resistance associated substitution carried on viral isolates and comorbidities in infected patients. Therefore, tailored therapy is required to cure HCV infection. Failure to comply with these conditions may impair success of HCV eradication expected by 2030. This Special Issue aims to discuss eradication perspectives related to therapy efficacy in patients with chronic diseases, developments in diagnostic procedures and improvements in screening policy.
MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

**Open Access**
Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

**Author Focus**
Authors and editors profit from MDPI’s over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

**High Quality & Rapid Publication**
MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

**High Visibility**
Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), the Verzeichnis lieferbarer Bücher (VLB).

**Print on Demand and Multiple Formats**
MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
