ISBN 978-3-0365-5207-1 (PDF)

Forest hydrology, as a discipline, was designed to address fundamental questions regarding the impact of deforestation on floods and droughts. Recently, forest hydrology has become a primary discipline in the biophysical sciences to clarify how forests and water interact. Despite the remarkable and detailed progress of research on forest hydrology, the original questions have not yet been fully answered. Additionally, the knowledge gained through this research has not yet been integrated into real-world forest and water management. Payment for environmental services (PES) schemes have recently become available as a new tool for forest and water management; however, most of these schemes fail to consider recent advances in forest hydrology.

This reprint aims to gather both recent scientific research on forest hydrology based on long-term data, and integrated watershed management based on current research in forest hydrology. Ten original contributions from China, Japan, United States, Korea, Brazil, Vietnam, Indonesia, and Slovakia were included.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
