Computational Collective Intelligence with Big Data–AI Society

Guest Editors:

Dr. Sathishkumar Veerappampalayam Easwaramoorthy
Department of Industrial Engineering, Hanyang University, 222 Wangsimini-ro, Seongdong-gu, Seoul 04763, Republic of Korea

Dr. Malliga Subramanian
Department of Computer Science and Engineering, Kongu Engineering College, Perundurai, Tamilnadu, India

Deadline for manuscript submissions:
closed (30 September 2023)

Message from the Guest Editors

Dear Colleagues,

The objective of Computational Collective Intelligence is to explore new methodological, theoretical, and practical aspects of computational collective intelligence.

With the rise of big data, much research is needed to understand how to combine "big data" with "collective intelligence." Collective intelligence has been a significant research topic in many AI communities. Therefore, the goal of the Special Issue is to use computational collective intelligence to find solutions to the problems of processing big data. The potential topics include but are not limited to the following:

1. Big data and knowledge representation;
2. Knowledge discovery from big data;
3. Collective intelligence from social data;
4. Applications of computational collective intelligence;
5. collective computational intelligence for medial image and any other domain;
6. Natural language processing and computational collective intelligence.

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.
Journal Rank: JCR - Q1 (Computer Science, Theory and Methods) / CiteScore - Q1 (Computer Science Applications)
