

Special Issue

Application of Machine and Deep Learning in Cyber-Physical Systems (CPSs)

Message from the Guest Editors

We invite submissions to our Special Issue focused on the innovative application of machine learning techniques in cyber-physical systems (CPSs). As CPSs become increasingly integral to a wide range of industries, there is a growing need for intelligent systems that can effectively integrate computational and physical processes.

This special issue aims to bring together researchers, practitioners, and industry experts to discuss cutting-edge advancements in the field.

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Min Chen

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
