

Special Issue

Artificial Intelligence and Big Data Analytics for Sustainable Healthcare Systems

Message from the Guest Editors

This Special Issue, entitled “Artificial Intelligence and Big Data Analytics for Sustainable Healthcare Systems,” will highlight innovative research that integrates AI, health informatics, and data-driven computational methods to improve the sustainability of care delivery. We welcome research that leverages large, heterogeneous datasets. We encourage contributions addressing cognitive and intelligent computing approaches, interpretable and responsible AI, fairness-aware models, and the integration of data-driven systems into real clinical and public health workflows. Topics of interest include big data pipelines for healthcare, scalable machine learning for population health, intelligent decision support, AI-assisted epidemiological surveillance, the optimisation of medical resource allocation, and evaluations of the societal, economic, or ecological impacts of AI-enabled healthcare innovation. This Special Issue will provide a multidisciplinary platform for advancing the development of sustainable, data-intensive, and human-centred healthcare systems. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Min Chen

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
