

Special Issue

Artificial Cognitive Systems for Computer Vision

Message from the Guest Editors

In recent years, the convergence of artificial intelligence and computer vision has heralded a new era of unprecedented possibilities. As the demand for more intelligent and perceptive systems continues to grow, the integration of artificial cognitive capabilities into computer vision has become a focal point of extensive research and development. This Special Issue aims to unite cutting-edge research and advancements in the realm of "Artificial Cognitive Systems for Computer Vision." For this Special Issue, we invite researchers, academics, and practitioners to submit original research papers on artificial cognitive approaches for advancing computer vision systems. We seek contributions that focus on leveraging machine learning, cognitive reasoning, and related methods to enhance computer vision capabilities. Authors are encouraged to explore innovative ways of using cognitive inference mechanisms to improve algorithm efficiency, accuracy, and adaptability. Additionally, insights into integrating advanced computer vision models for cognitive tasks, along with practical implementations and empirical evaluations in real-world scenarios, are highly valued.

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Min Chen

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
