Special Issue

Big Data and Cognitive Computing: Feature Papers 2020

Message from the Guest Editors

Cognitive computing allows reducing the complexity of Big Data to help humans in decision making within the vast and growing seas of Internet of Things. This Special Issue will include high-quality papers (original research articles or comprehensive review papers) in open access format, by the Editorial Board Members, or those invited by the Editorial Board Members and the Editorial Office. Papers will be published, free of charge, after peer review. The scope of "Big Data and Cognitive Computing" includes but is not limited to the following topics:

- Big data, Clouds, Edge, and Internet of Things (IoT)
- Cognitive computing

About the Journal

Message from the Editor-in-Chief

Big Data and Cognitive Computing (BDCC) is a scholarly
online journal which provides a platform for big data
theories with emerging technologies on smart clouds
and exploring supercomputers with new cognitive
applications. It is a peer-reviewed, open access journal
that publishes high quality original articles, reviews and
short communications. The primary aims of this journal
are to encourage contributions of high quality scientific
papers relating to data management and analytics in
industry, such as manufacturing, healthcare, education,
media and business, data mining, and cognitive science.
There is no restriction on the maximum length of the
papers.

of Technology, Guangzhou 510641, China

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), dblp,
Inspec, Ei Compendex, and other databases.

Journal Rank:
JCR - Q1 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computer Science Applications)
